Chemistry Department Advising and Mentorship

All major advising in Chemistry (upper and lower division) is currently carried out by the College of Science Student Success Center. They will be advising students for all pathways to a Bachelor's Degree including B.S. Chemistry, B.S. Chemistry, Biochemistry Concentration, and the B.A. in Chemistry. Urgent questions may be directed to the department chair, but routine advising questions, including advising hold removal, should be directed to the College of Science Student Success Center Advisors.

Students may contact Chemistry faculty mentors as needed for specific questions, such as advice about career paths, graduate and professional school, and upper division elective choices. Please reach out to the faculty member below based on your degree path and the last two digits of your student ID.
