KC's CHEM 30A TUTOR CORNER:

5 STUDY HACKS FOR SUCCESS

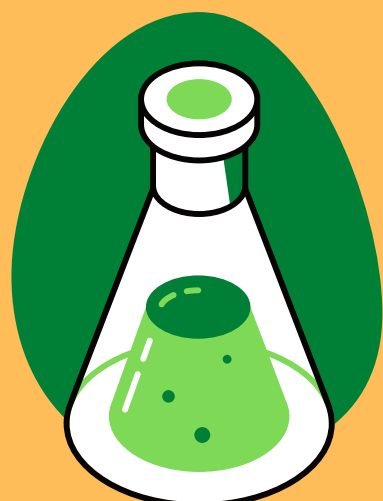

PREPARE FOR LECTURE

Make sure you preview your lecture slides and read your textbook before coming to lecture! If possible, print out the slides, so you can directly take notes on them.

USE THE SYLLABUS

Print out or download a copy of the syllabus and mark important dates (like exams!) on your calendar, so you can plan to study accordingly rather than procrastinating the night before!

PERSONALIZE YOUR NOTES

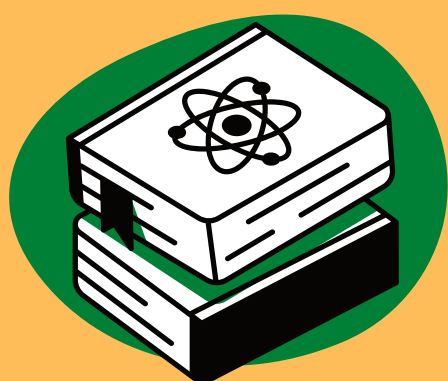

Use words that help you remember! Rewrite the information in your own words!

Use pictures, diagrams, and charts!

AVOID DISTRACTIONS

Put your phone on do not disturb! Set alarms to have productive sessions. Do it in intervals with breaks! For example: 20 minutes of focus and 5 minute breaks and then repeat!

ENGAGE WITH OTHERS!

Form study groups! Attend office hours! Set an appointment for online tutoring with me! For more information:
