Long Term Programs

**Exchange:** SJSU offers a range of Exchange programs for a single semester or the academic year. Programs are available at over 38 universities in 18 different countries. You can find the program that is right for you by searching by region, country, or your major/minor.

**CSUIP:** The California State University Chancellor's Office manages study abroad programs at a network of international universities. Students pay SJSU tuition, however, programs are also partially subsidized by the CSU system making them very affordable. All programs run for one year.

**ISEP:** The International Student Exchange Program (ISEP) is a non-profit SJSU partner with connections to 328 colleges and universities around the world. ISEP is dedicated to helping students overcome the financial and academic barriers to study abroad.

Short Term Programs

**FLP:** Faculty-Led Programs are overseas courses taught by SJSU faculty from various academic fields for 2-4 weeks during the academic breaks of Winter, Spring, and Summer. They are considered SJSU Special Session courses and typically range from 3-6 units. A majority of our programs satisfy upper division GE courses (Area R, S, & V) and some also offer major-specific courses.

**SSA:** Summer School Abroad provides students the opportunity to study abroad for a short period of time during the Summer break. Normally lasting 2-4 weeks, SSAs allow you to enroll in a short-term program at a university abroad while still earning SJSU course credits. You will have the chance to study alongside college students from around the world on these international programs, making cross-cultural connections that will last you the rest of your life!

**Interships and SLP:** Complete an International Internship or join a Service Learning Project at one of SJSU’s global partner locations. Earn SJSU credit during Summer break, programs lengths may vary.

Nutritional Science International Experience Statement

All students entering the Department of Nutrition, Food Science, & Packaging in or after fall 2018 are required to participate in an international experience to gain cross-cultural and cross-national insight into the political, social, cultural and economic factors that influence nutritional science in international environments.

A relevant cross-cultural experience in the U.S. can be substituted at the discretion of the Department Chair. Visit your Academic Counselor for more information.
