

**San José State University**  
**Science/Computer Science**  
**CS 255, Design and Analysis of Algorithms, Section 1, Fall, 2023**

**Course and Contact Information**

Instructor(s): Aikaterini Potika

Office Location: MacQuarrie Hall 215

Telephone: 408-9245134

Email: katerina.potika@sjsu.edu

Office Hours: Mondays & Wednesdays 9:30-10 am & Mondays 12-1 pm (hybrid) or by appointment  
Join from PC, Mac, Linux, iOS or Android:

<https://sjsu.zoom.us/j/91441895686?pwd=Nlp1aExvU2JtaTNKY3VOblk4NEdjQT09>

Password: 793531

Class Days/Time: Monday and Wednesday 1:30-2:45 pm

Classroom: Duncan Hall 450

Prerequisites: CS 155 or instructor consent

**Course Description**

Randomized algorithms. Parallel algorithms. Distributed algorithms. NP-completeness of particular problems. Approximation algorithms.

**Course Format**

**Technology Intensive, Hybrid, and Online Courses**

The course adopts an online classroom delivery format. An internet connection and a computer and a tablet or smartphone is required.

**Faculty Web Page and MYSJSU Messaging**

Course materials such as syllabus, handouts, notes, assignment instructions, etc. can be found on Canvas Learning Management System course login website at <http://sjsu.instructure.com>. You are responsible for regularly checking with the messaging system through MySJSU on Spartan App Portal <http://one.sjsu.edu> (or other communication system as indicated by the instructor) to learn of any updates. For help with using Canvas see Canvas Student Resources page ([http://www.sjsu.edu/ecampus/teaching-tools/canvas/student\\_resources](http://www.sjsu.edu/ecampus/teaching-tools/canvas/student_resources)).

**Course Learning Outcomes (CLO)**

Upon successful completion of this course, students will be able to:

- **CLO1** -- Analyze or code a randomized algorithm
- **CLO2** -- Analyze or code a parallel algorithm using a thread library
- **CLO3** -- Analyze or code a parallel algorithm using a library such as OpenCL
- **CLO4** -- Analyze the correctness and run time of a distributed algorithm

- **CLO5** -- Given a problem within NP that is promised to be either in P or NP-complete prove which it is
- **CLO6** -- Analyze or code a number theoretic algorithm
- **CLO7** -- Analyze or code an approximation algorithm for an optimization problem whose decision problem is NP-complete.

## Required Texts/Readings (Required - Delete the word "Required" in final draft)

### Textbook

No required textbook we will use chapters from various books:

1. Cormen, Leiserson, Rivest and Stein, Introduction to Algorithms, 3rd Edition MIT Press, 2009. You can find errata (bug reports) for the book <http://www.cs.dartmouth.edu/~thc/clrs-bugs/bugs-3e.php>.
2. Kleinberg and Tardos, Algorithm Design, First edition, Addison Wesley, 2005.
3. Dasgupta, Papadimitriou and Vazirani, Algorithms, McGraw-Hill, 2006.
4. Vazirani, Approximation Algorithms, Springer, 2003
5. [Randomized Algorithms](#). Rajeev Motwani and Prabhakar Raghavan

### Other technology requirements / equipment / material

Computer

## Course Requirements and Assignments (Required - Delete the word "Required" in final draft)

Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of 45 hours over the length of the course (normally three hours per unit per week) for instruction, preparation/studying, or course related activities, including but not limited to internships, labs, and clinical practica. Other course structures will have equivalent workload expectations as described in the syllabus.

**Homework assignments:** individual, regularly assigned, will include written problem assignments, and perhaps some online exercises. Solutions will not be posted. The homework is a tool for you to learn the material and prepare you for the exams.

**Reading assignments:** Reading assignments are regular and for the next class.

**Quizzes:** Unannounced quizzes (at least 4) may be given during class, each taking about 5 minutes total. These generally are problems from the reading assignment and/or the homework.

**Project (Programming and Presentation):** A programming project of your choice related to the course in groups of two students. At the end of the semester you will present the project in the class. Never use any code you find on the web, unless it is given by me. Penalty for late submission 5% for every 3 days up to 9 days, after that no submission will be accepted. Never email your assignments.

**Midterm exams:** One Midterm exam during the semester.

### Final Examination or Evaluation

One final, written, and cumulative exam, split in two parts. The exams contain multiple-choice questions, short answer questions and questions that require pseudocode and/or computations.

## Grading Information

No extra point options (only the final exam offers extra points option).

All exams are closed books, and the final exam is comprehensive. No make-ups exams except in case of verifiable emergency circumstances.

### Determination of Grades

Final Grade:

20% Project (programming and presentation)

10% Quizzes

10% Homework

5% Participation

5% Discussions

30% Midterms (two)

20% Final

| <i>Grade</i> | <i>Percentage</i> |
|--------------|-------------------|
| A plus       | 96 to 100%        |
| A            | 93 to 95%         |
| A minus      | 90 to 92%         |
| B plus       | 86 to 89 %        |
| B            | 82 to 85%         |
| B minus      | 78 to 82%         |
| C plus       | 74 to 77%         |
| C            | 70 to 73%         |
| C minus      | 65 to 69%         |
| D plus       | 62 to 64%         |
| D            | 58 to 61%         |
| D minus      | 55 to 57%         |
| F            | <54%              |

## Classroom Protocol

Attendance is highly recommended. Please avoid disturbing the class: turn-off cell phones (or put them on vibrate mode), no text messaging in the class or the exams, no taking pictures and video, avoid coming late, no

talking or whispering with other students during the instructor's presentation. You may not publicly share or upload material from this course such as exam questions, lecture notes, or solutions without my consent.

## University Policies

Per [University Policy S16-9](#), relevant university policy concerning all courses, such as student responsibilities, academic integrity, accommodations, dropping and adding, consent for recording of class, etc. and available student services (e.g. learning assistance, counseling, and other resources) are listed on [Syllabus Information web page](https://www.sjsu.edu/curriculum/courses/syllabus-info.php) (<https://www.sjsu.edu/curriculum/courses/syllabus-info.php>). Make sure to visit this page to review and be aware of these university policies and resources.

The instructor might drop students that do not show up during the first two lectures.

## COVID-19 and Monkeypox Safety Training

Students registered for a College of Science (CoS) class with an in-person component should view the [CoS COVID-19 and Monkeypox Training slides](#) for updated CoS, SJSU, county, state and federal information and guidelines, and more information can be found on the SJSU Health Advisories website. By working together to follow these safety practices, we can keep our college safer. Failure to follow safety practice(s) outlined in the training, the [SJSU Health Advisories website](#), or instructions from instructors, TAs or CoS Safety Staff may result in dismissal from CoS buildings, facilities or field sites. Updates will be implemented as changes occur (and posted to the same links).

## CS255: Design and Analysis of Algorithms, Fall 2023

The schedule is subject to change with fair notice and announced on Canvas.

### Course Schedule

| Lesson | Date | Topic  | Assignments |
|--------|------|--|-------------|
| 1      | 8/21 | Syllabus   |             |
| 2      | 8/23 | Introduction: Algorithms & Computers, Challenge exam | HW 1        |
| 3      | 8/28 | Running time, growth of functions                    |             |
| 4      | 8/30 | Graphs, BFS, DFS, topological sorting                |             |
|        | 9/4  | Break  |             |
| 5      | 9/6  | Parallel and Distributed Algorithms (Ch 12 MR)       |             |
| 6      | 9/11 | PRAM model   |             |

|    |       |  |                        |
|----|-------|--|------------------------|
| 7  | 9/13  | Greedy Algorithms: Scheduling, Shortest paths, Caching, knapsack       |                        |
| 8  | 9/18  | Greedy Algorithms: Minimum spanning tree, clustering                   |                        |
| 9  | 9/20  | Divide & Conquer: sorting, integer/matrix multiplication, max subarray | HW 2                   |
| 10 | 9/25  | Divide & Conquer: computational geometry                               |                        |
| 11 | 9/27  | Dynamic Programming: scheduling, knapsack                              |                        |
|    | 10/2  | Midterm 1  |                        |
| 12 | 10/4  | Dynamic Programming: all pair shortest path                            |                        |
| 13 | 10/9  | Network flow, applications   | Project proposal (due) |
| 14 | 10/11 | Network flow, applications   |                        |
| 15 | 10/16 | Heaps, Amortized Analysis  |                        |
| 16 | 10/18 | Amortized Analysis cont.   |                        |
| 17 | 10/23 | Randomization: Quicksort   | Project Sprint 1 (due) |
| 18 | 10/25 | Randomization: Hashing   |                        |
| 19 | 10/30 | Intractability, P, NP, NP-completeness,                                |                        |
| 20 | 11/1  | Intractability, P, NP, NP-completeness, reductions                     |                        |
| 21 | 11/6  | Intractability, P, NP, NP-completeness, reductions                     | Project Sprint 2 (due) |
| 22 | 11/8  | Midterm 2  | HW 3                   |
| 23 | 11/13 | Intractability, P, NP, NP-completeness, reductions                     |                        |
| 24 | 11/15 | Approximation Algorithms   |                        |
| 25 | 11/20 | Approximation Algorithms   | Project Sprint 3 (due) |
|    | 11/22 | Break  |                        |
| 26 | 11/27 | Distributed Algorithms   |                        |
| 27 | 11/29 | Distributed Algorithms   |                        |

|           |       |                                      |  |
|-----------|-------|--------------------------------------|--|
| <b>28</b> | 12/4  | Project Presentations                |  |
| <b>29</b> | 12/6  | Project Presentations                |  |
|           | Final | Wednesday, December 13 12:15-2:30 PM |  |
