CS 185C-01
Introduction to Data Analysis & Visualization
TuTh 12:00PM - 1:15PM   Course # 22207

Instructor: Wendy Lee, Ph.D.   wendy.lee@sjsu.edu

Prerequisites: CS22B and graduate standing, or CS146

Topics:

- Filter, combine, reshape, and transform large datasets.
- Handle missing or inconsistent values in datasets.
- Perform data mining and data analysis.
- Create static and interactive data visualizations.
- Analyze big data using techniques such as memory mapping, zero memory copy policy, and lazy computations.
