

CS185C: Command line and systems programming for data-intensive applications, Fall 2021

San Jose State University, Department of Computer Science
Professor William B. Andreopoulos

Tuesday-Thursday 4:30PM - 5:45PM (online)

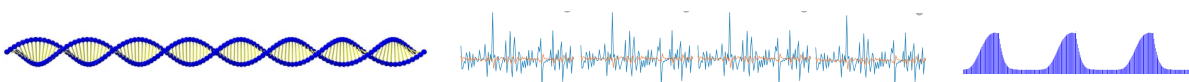

```
case $1 in
    -l|--learn)
        echo "How you can use Bash" \
            "case statements"
        ;;
esac
```

Learn how to:

- Use the UNIX/Linux command line
- Write shell scripts
- Perform essential system administration tasks
- Customize environment and user accounts
- Do data science like a power user
- Build data analytics pipelines
- Perform essential data manipulation
- Automate repeated tasks
- Run bioinformatics applications
