

**San José State University**  
**Department of Computer Science**  
**CS 252, Adv. Programming Language Principles, Section 01, Spring 2018**

**Course and Contact Information**

<b>Instructor:</b>	Thomas H. Austin
<b>Office Location:</b>	MacQuarrie Hall 216
<b>Email:</b>	<a href="mailto:thomas.austin@sjsu.edu">thomas.austin@sjsu.edu</a>
<b>Office Hours:</b>	Mondays, 3-4pm (4-5pm Feb. 5 and Feb19 only), Tuesdays, 10-11am
<b>Class Days/Time:</b>	Monday/Wednesday 10:30 – 11:45
<b>Classroom:</b>	MacQuarrie Hall 225
<b>Prerequisites:</b>	CS 152 or instructor consent. Familiarity with functional programming is assumed.

**Course Format**

**Course Web Page**

Course materials such as syllabus, handouts, notes, assignment instructions, etc. can be found on my faculty web page at <http://www.cs.sjsu.edu/~austin/cs252-spring18/> and on Canvas Learning Management System course login website at <http://sjsu.instructure.com>. You are responsible for regularly checking with the messaging system through Canvas to learn of any updates.

**Course Description**

*(Copied from <http://info.sjsu.edu/web-dbgen/catalog/courses/CS252.html>). Language design and paradigms, including concepts underlying functional, logic, object-oriented and parallel paradigms. Theoretical foundations, including lambda calculus, denotational and axiomatic semantics. Proofs of program correctness. Programming projects emphasizing different aspects of language design..*

**Course Learning Outcomes (CLO)**

Upon successful completion of this course, students will be able to:

1. Read and write operational semantics
2. Read and write formal type systems
3. Write moderately sized Haskell applications
4. Read and review research papers in the field of programming languages

## Required Texts/Readings

### Textbook

Required materials: We will use a variety of online resources, including:

- "Learn You a Haskell for Great Good", available at <http://learnyouahaskell.com/>
- "Eloquent JavaScript", available at <http://eloquentjavascript.net>
- More references TBD, assigned in Canvas

## Course Requirements and Assignments

SJSU classes are designed such that in order to be successful, it is expected that students will spend a minimum of forty-five hours for each unit of credit (normally three hours per unit per week), including preparing for class, participating in course activities, completing assignments, and so on. More details about student workload can be found in [University Policy S12-3](http://www.sjsu.edu/senate/docs/S12-3.pdf) at <http://www.sjsu.edu/senate/docs/S12-3.pdf>.

This class will involve 5 significant programming assignments, a midterm & a final (no notes), and a final project & presentation. Lastly, there will be labs for most days of class.

Exams and homework must be done individually. If two students turn in overly similar code, both get a zero, and both may be reported for plagiarism.

For the class project, you may work alone or with a partner at your discretion. Note that more will be expected of your project if you have a partner.

Labs are graded complete/incomplete. As long as you attempt and submit the lab, you will get full credit. For labs, you may work with others if you wish. Be forewarned, exam questions are often similar to lab questions. If you do not understand your lab solution, you are not likely to succeed on the exams.

NOTE that [University policy F69-24](http://www.sjsu.edu/senate/docs/F69-24.pdf) at <http://www.sjsu.edu/senate/docs/F69-24.pdf> states that "Students should attend all meetings of their classes, not only because they are responsible for material discussed therein, but because active participation is frequently essential to insure maximum benefit for all members of the class. Attendance per se shall not be used as a criterion for grading."

## Grading Information (Required)

1. 30% -- Homework assignments
2. 20% -- Midterm
3. 20% -- Final (Monday, May 21. 9:45-noon)
4. 20% -- Project
5. 10% -- Participation (labs and pop-quizzes)

Assignments are due by 11:59 PM Pacific Time on the specified day. **Late homework assignments will not be accepted.**

Nominal grading scale:

Percentage	Grade
92 and above	A
90 - 91	A-
88 - 89	B+
82 - 87	B
80 - 81	B-
78 - 79	C+
72 - 77	C
70 - 71	C-
68 - 69	D+
62 - 67	D
60 - 61	D-
59 and below	F

Note that “All students have the right, within a reasonable time, to know their academic scores, to review their grade-dependent work, and to be provided with explanations for the determination of their course grades.” See [University Policy F13-1](http://www.sjsu.edu/senate/docs/F13-1.pdf) at <http://www.sjsu.edu/senate/docs/F13-1.pdf> for more details.

### Classroom Protocol

Please show up to class on time. If students arriving late becomes a problem, I will start classes with pop quizzes.

### University Policies

Per University Policy S16-9, university-wide policy information relevant to all courses, such as academic integrity, accommodations, etc. will be available on Office of Graduate and Undergraduate Programs’ [Syllabus Information web page](http://www.sjsu.edu/gup/syllabusinfo/) at <http://www.sjsu.edu/gup/syllabusinfo/>”

## CS 252 Advanced Programming Language Principles, Spring 2018, *Tentative* Course Schedule

### *Tentative* Course Schedule

Week	Date	Topics, Readings, Assignments, Deadlines
1	January 24	Course introduction
2	January 29	Introduction to Haskell
2	January 31	Haskell, continued
3	February 5	Higher order functions
3	February 7	Big-step operational semantics

Week	Date	Topics, Readings, Assignments, Deadlines
4	February 12	LaTeX and project overview
4	February 14	Algebraic data types & functors
5	February 19	Applicative functors
5	February 21	Monads
6	February 26	Parser generators
6	February 28	Review session
7	March 5	<b>***MIDTERM (tentative date – check Canvas)***</b>
7	March 7	Lambda calculus
8	March 12	Introduction to JavaScript
8	March 14	Scoping in JavaScript
9	March 19	Event-based programming
9	March 21	Macros & Sweet.js
10	March 26	<b>SPRING BREAK – NO CLASS</b>
10	March 30	<b>SPRING BREAK – NO CLASS</b>
11	April 2	Type systems and small-step semantics
11	April 4	JavaScript Object Proxies
12	April 9	Simply typed lambda calculus
12	April 11	Introduction to Ruby
13	April 16	Just-in-time (JIT) compilation
13	April 18	Ruby blocks
14	April 23	Language-based security mechanisms
14	April 25	TBD
15	April 30	TBD
15	May 2	TBD
16	May 7	Project presentations
16	May 9	Project presentations
17	May 14	Final review
Final Exam	May 21	MacQuarrie Hall 225, 9:45-noon
