

The Technology Partnership Program– Department of Computer Science

Overview and Vision

The SJSU Computer Science Department graduates approximately 300 students annually with BSCS, BSSE or MSCS degrees. These graduates are disciplined, creative programmers, versed in the latest technology and tempered with teamwork and communication skills. To facilitate industry engagement with students, graduates, and faculty, the department has created the Technology Partnership Program.

Partnership Opportunities

- **Recruitment Opportunities** – Partners can recruit eager students in the informal atmosphere of monthly mixers, by giving brief in-class presentations, and by broadcasting positions through email.
- **Influence Opportunities** – Partners can influence curriculum and research through student and faculty recognition awards, industry advisory board service, and research stipends.
- **Enhancement Opportunities** – Partners can enhance curriculum and research by sponsoring extracurricular programs, clubs, and coding competitions.
- **Marketing Opportunities** – Partners can display their logo on the departmental web site (with a link to partner's site) and in the department's entry hall.

Partnership Levels

Technology Partners provide the funds needed to develop and deliver an appropriate curriculum that keeps pace with the rapidly-changing technology industry.

Annual Investment Opportunity	Partner Level			
	I	II	III	IV
	\$5,000	\$10,000	\$25,000	\$50,000*

*3-year Partnership; may be fulfilled over 3 years

Other Individual Opportunities: Student project stipends, faculty research projects, scholarships, term faculty positions, naming opportunities, etc.

Supported Programs

Partner investments are tax-deductible donations, and are used to support a variety of programs, including Peer Mentoring, a Tutoring Center, student projects, coding competitions, guest speakers, and student research projects.
