## ***Executive Roundtable Sponsors***

### **FireEye Executive Roundtable Co-Sponsor: Ashar Aziz, Vice Chairman of the Board, CTO & Chief Strategy officer**

Ashar founded FireEye in 2004 and now serves as vice chairman of the board, CTO, and chief strategy officer. Since founding the company he has also served as CEO through November 2012 and has led the technical and business strategies for FireEye. He is the original inventor of the core set of technologies behind the groundbreaking FireEye Malware Protection System. This work has led to the filing of over 18 patents on various aspects of FireEye technologies. Ashar has received over 20 patents in the areas of networking, cryptography, network security, and data center virtualization for work done prior to FireEye. Before FireEye, Ashar founded Terraspring, a company focused on data center automation and virtualization. Terraspring was successfully acquired by Sun Microsystems in 2002, where Ashar then served as CTO of the company's N1 program. Before Terraspring, Ashar spent twelve years at Sun as a distinguished engineer focused on networking and network security. Ashar holds an S.B. in Electrical Engineering and Computer Science from the Massachusetts Institute of Technology and an M.S. in Computer Science from the University of California, Berkeley, where he received the UC Regents Fellowship.

### **FACEBOOK's Jenn Lesser, Manager Security Operations**

In her current role, Jenn is responsible for budget, roadmap, hiring and organization management, along with Program Management for key cross functional initiatives, both inside and outside Facebook. A jack of all trades, she also works on outreach both internally and externally related to Security awareness.

### **Veracode's Chris Wysopal, Co-founder, CTO & Chief Information Security Officer**

Chris Wysopal, co-founder and chief technology officer of Veracode, is responsible for the security analysis capabilities of Veracode technology. Mr. Wysopal is recognized as an expert and a well known speaker in the information security field and was recently named one of InfoWorld's Top 25 CTO's and one of the 100 most influential people in IT by the editorial staffs of eWeek, CIO Insight and Baseline Magazine. He has given keynotes at computer security events and has testified on Capitol Hill on the subjects of government computer security and how vulnerabilities are discovered in software.

### **McAfee's Michelle Dennedy, Vice President and Chief Privacy Officer, McAfee**

Michelle Dennedy is responsible for the development and implementation of McAfee data privacy policies and practices. Dennedy founded The iDennedy Project, an organization to address privacy needs in sensitive populations. She is a founder and editor in chief of the site TheIdentityProject.com, focused on the crime of Child ID theft. She was the VP for Security & Privacy Solutions for the Oracle Corporation. Previously, she was Chief Data Governance Officer at Sun Microsystems, Inc. She also served as Sun's Chief Privacy Officer. She has a J.D. from Fordham University School of Law and a B.S. degree with honors from The Ohio State University. In 2009, she was awarded the Goodwin Procter-IAPP Vanguard award for lifetime achievement and the EWF – CSO Magazine Woman of Influence award.

### **VISA, Inc. - Gary Warzala, Chief Information Security Officer**

Gary is responsible for all aspects of the information security program, including business continuity and IT risk management. Before coming to Visa, Warzala was the CISO at the Aon Corporation in Chicago, and GE Aviation in Cincinnati, OH. He began his career at GE, where he held senior management positions in telecommunications, architecture, application development, and information security. Warzala received his MBA from Xavier University and BS degree from Utica College of Syracuse University.

## ***Executive Roundtable Sponsors***

### ***PGE - Steve Knaebel, Director, Cybersecurity Pacific Gas and Electric Company***

Steve has 30 years of utility industry experience. In his role as Director of Policy Compliance & Awareness he is responsible for a team of cybersecurity professionals that develop and implement cybersecurity policies and standards. These policies and standards lay the foundation for the controls that protect Pacific Gas and Electric Company's (PG&E) Critical Infrastructure. Steve is also responsible for ensuring that PG&E is meeting compliance with federal, state, and local laws such as, NERC CIP, SOX, PII, FCC and HIPPA. Additionally, Steve is responsible for developing cybersecurity Awareness and Training programs. These programs provide employees with the tools and knowledge to help protect customer and employee information and keep our Critical Infrastructure secure. Steve is currently leading several research projects in partnership with Lawrence Livermore National Labs for the development of cybersecurity modeling tools. Steve has an MBA in Technology Management, and is PMP certified.

### ***Deloitte & Touche - Kieran Norton, US leader of Deloitte & Touche LLP's Cyber Threat Management***

Kiernan has a deep technology background, broad range of experience over a 20-year career and a sharp focus on tackling emerging risks. Kieran is able to provide his clients with strategic yet pragmatic perspectives on addressing critical risks in a business focused and impactful manner. Kieran leads a team of highly talented practitioners who assist clients in transforming their current efforts into advanced cyber threat management programs, building threat defense architectures, cultivating actionable cyber threat intelligence and responding to cyber incidents. In this role, Kieran drives continued development and growth of our services, serves some of Deloitte & Touche's largest clients and leads cyber threat management engagements. Prior to Deloitte & Touche, Kieran spent a decade in the IT industry and in professional services firms, and has a background in information security, IT operations and application development. Kieran is a Certified Information Systems Security Professional (CISSP) as well as a frequent speaker at industry conferences and events. He has been interviewed as a security subject matter specialist on several occasions and has authored multiple articles, most recently for the *Wall Street Journal* CIO edition.
