**Course Description (Required)**

Completion of a complex painting incorporating knowledge of drawing principles, construction, composition, value and technique. Prerequisite: ANI 055; Allowed declared Animation major only Misc/Lab: Activity 6 hours.

**Course Goals**

Students in 113B will build upon the fundamental skills of drawing and painting introduced in previous courses, while transitioning them to the equivalent in the digital medium. Special emphasis will be placed on the development of digital image-making proficiencies. They will further their understanding of perspective and composition through the completion of a series of drawings, still life studies, and value & color studies culminating in the production of two complex illustrations. The studies are designed to facilitate the finished illustrations: Two color renderings of an indigenous Northern California forest facilitated by their own study of the natural environment. The paintings must include recognizable plants and animals appropriate to the chosen environment, and satisfying the process and instructions presented throughout the course. The final illustration will feature an introduction to some of the core methods common to the Visual Development processes. The finished paintings will be formatted to a 1.66:1, wide screen, aspect ratio.

## **Learning Outcomes (LO)**

1. LO1 to enable students to conceptualize, design, and complete two intricate illustrations within a proscribed deadline
2. LO2 introduce working methods necessary for concept artists in the screen arts
3. LO3 basic introduction to the Visual Development pipeline
4. LO4 generation of several renderings and exercises aimed at developing the understanding and ability to complete the final process

## **Course Learning Outcomes (CLO) (Required)**

Upon successful completion of this course, students will be able to:

1. CLO1 Students will develop better observational and interpretation skills
2. CLO2 Students will learn about and achieve greater “authenticity” in their work
3. CLO3 Students will learn to streamline production flow and juggle the stresses of rapid project deadlines
4. CLO4 Students will have a greater understanding of visual communication and story telling
5. CLO5 Students will be able to complete mature, professional level illustrations through a complex, effective process

## **Required Texts/Readings (Required)**

### **Textbook**

Links to online materials will be provided in class corresponding with appropriate projects. There are no required texts to purchase.

### **Other Readings**

Color and Light: A Guide for the Realist Painter, James Gurney, Andrews McMeel 2010

Imaginative Realism: How to Paint What Doesn't Exist, James Gurney, Andrews McMeel 2009

### **Other technology requirements / equipment / material**

A portable digital painting set up, lamp, egg, acorn, pine cone, sketchbook

## **Course Requirements and Assignments (Required)**

Students will complete the following studies applicable to the final assignment:

1. Digital rendering of an Egg on a dynamic background
2. Digital rendering of the Pine Cone on dynamic background
3. Digital rendering and study of a NA tree in different lighting situations
4. Research, one-sheet, thumbnails, value comps, layouts, building a model, and color comps building towards the final paintings
5. Study of supporting story information resulting in a general complementary design
6. 2 Final Paintings with different moods
7. A sketchbook of weekly assignments and material related to projects

“Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of 45 hours over the length of the course (normally three hours per unit per week) for instruction, preparation/studying, or course related activities, including but not limited to internships, labs, and clinical practica. Other course structures will have equivalent workload expectations as described in the syllabus.”

### **Final Examination or Evaluation**

Conceptualization, design, and complete two intricate illustrations within a proscribed deadline.

“Faculty members are required to have a culminating activity for their courses, which can include a final examination, a final research paper or project, a final creative work or performance, a final portfolio of work, or other appropriate assignment.”

### **Grading Information (Required)**

Each assignment is designed to facilitate a better execution of the final project. All of the work is necessary for successful completion of the course. There is no grading curve, each student is carefully assessed individually, but all students are held to the same grading standards. Extra credit is available in the form of simple reports taken after event attendance (10 per half grade). Missed assignments may not be turned in any later than one class session after the deadline, and will be marked down heavily (usually no higher than a “C” is possible in this case). Work not turned in by this date will automatically fail. There is a small portion of the grade reserved for participation. Attendance will never be graded, but the absent student is solely responsible for acquiring any missed information.

### **Determination of Grades**

- Grades are standard letter, and include +/-.
- Extra credit is 5 visits to program events equals one half grade, upon submission of a short write up and signature from a club official or event staff (never a faculty member)
- Students wishing to receive an A grade must turn in all assignments on time and do excellent work. • Work can be submitted one day late for one letter reduction in grade. It cannot be submitted after that. • A list of the percentage weight assigned to various class assignments is provided below.

ANI 113B, SPRING, 2019 Page 3 of 6

A grades indicate excellent work.

B grades indicate above average work.

C grades indicate average work.

D grades indicate below average work.

F grades are failing.

A plus = 100% to 97%

A = 96% to 93%

A minus = 92% to 90%

B plus = 89% to 87%

B = 86% to 83%

B minus = 82% to 80%

C plus = 79% to 77%

C = 76% to 73%

C minus = 72% to 70%

D plus = 69% to 67%

D = 66% to 63%

D minus = 62% to 60%

F = 59% to 0%

1. Digital rendering of an Egg on a dynamic background 5%
2. Digital rendering of the Pine Cone on dynamic background 10%
3. Digital Rendering and study of a NA tree in different lighting situations 10%
4. Research, one-sheet, thumbnails, value comps, layouts, building a model, and color comps building towards the final paintings 30%
5. Study of supporting story information resulting in a general complementary design 10%
6. 2 Final Paintings with different moods 20%
7. A sketchbook of weekly assignments and material related to projects 10%
8. Participation

## **Classroom Protocol**

### **Animation/Illustration Program Policies**

- Students must arrive to class on time with materials ready to work.
- Cell phones must be silenced.
- Private conversations during lectures and class discussions are not permitted.
