Course Description
Portfolio preparation using various media and methods for effective professional presentation.

This is a studio-intensive course where a series of projects address San José State Graphic Design program learning objectives. (Program learning objectives can be referenced on the department’s website: https://www.sjsu.edu/design/graphic-design/degrees.php)

Participants in this hands-on studio course will confront specific design problems, working individually and in teams. Group discussions and critiques are balanced with individual meetings with faculty and visit with guest critics. Participation in forums and reviews is vital to their success in this class.

Course Goals
Students will build and refine their portfolios to a professional level and learn the process of preparing for life after school. This class will challenge students to use all their communication skills—verbal and visual—to present and speak about their design work articulately in print and online. Students will research careers, redo projects as needed, and refine their skills in presentation. We will also discuss job searches, interview techniques, and standards of professional conduct. The course will also give students a grounded understanding of graphic design as a professional practice through lectures, discussions, and readings.

Course Learning Outcomes (CLO)
Upon successful completion of this course, students will be able to:

CLO 1 – demonstrate understanding of the design process, design thinking, and professional standards, including a transition into preparing a portfolio to enter the working force;  
CLO 2 – develop career strategies, including the interview process and an understanding of financial matters;
CLO 3 – market themselves to address the current needs of the design profession;
CLO 4 – understand good business practices and professional ethics;
CLO 5 – reach audiences by applying principles of visual communication and understanding the role of design in society.

Recommended Readings & Textbooks
Readings & book recommendations will be provided throughout the course.

Course Requirements and Assignments
This course will include lectures, group discussions, presentations, and class time allotted for creative work. Participation in discussions, work sessions, and critiques is vital to the success of this class.

The course is comprised of three major projects and a number of other in-class activities. The objectives and parameters of each project will be described in detail during class. It will be your responsibility to take notes and ask questions as necessary until you fully understand the assignment. In addition to the major assignments, several small exercises will also be assigned. These include in-class exercises, readings, quizzes, etc.

This is a three-hour class. We will often take one scheduled 10-minute break halfway through the class period. You are expected to arrive on time and prepared to work for the entire class period. Although in-class work sessions are an integral component of this course, outside work on assignments will be necessary to meet project deadlines. Significant progress is expected between classes. You are responsible for coming to class with the completed assignment and all necessary tools and materials for continuing work on the assignment.

Projects are due at the beginning of each class, which means that your work must be displayed and ready for critique at that time. This may require that you arrive at class in advance so that you are on time. If you are more than 10 minutes late for class, you will be counted as tardy and it is possible that we may not critique your work.

Grading Information
The project and course performance will be evaluated according to the following components: Each project will be graded upon completion and assigned a letter grade according to the University policy—A through F.

Late assignments are subject to an F unless prior arrangements have been made. An incomplete will be granted to students with documented extenuating circumstances e.g. debilitating illness, family emergency etc. On-time presentation of all preliminary roughs and final comps, as well as progress during in-class working sessions, will be noted towards participation and preparation, “on-time” means that work is on the wall or otherwise placed as requested prior to the start of any critique or presentation. Bases for the grading are noted below:

Iteration/Experimentation CLO 1, 5
Exhibiting distinct approaches, perspectives, and/or uses of material in preliminary iterations. Testing a surprising variety of approaches during the initial stages of exercises and projects.
Concept Development/Critical Thinking  CLO 2, 3
Responding creatively to, and meeting, the constraints of the project. Discovering and leveraging creative opportunities arising from form, content, methods, and tools. Demonstrating the integration of research, analysis, iteration/drafting/sketching, and practice making.

Form-giving Skill  CLO 1, 2, 3, 5
Synthesizing design elements, principles, and attributes into effective and evocative messages. Demonstrating the quality necessary for effective visual communication.

Craft/Presentation  CLO 5
Exhibiting skill, sensitivity, dexterity, and attention to detail in design outcomes and their presentation.

Participation/ Preparation  CLO 1, 3, 4
Engaging in class activities and critiques. Showing initiative and commitment. Progressing steadily between classes, and arriving to class prepared to participate.

Typographic and Visual Literacy  CLO 1, 5
Understanding and manipulating the meaning of visual communication, through the use of images, design elements, typographic elements, and visual hierarchies. Using design and typographic terminology to speak effectively about design.

Grade Distribution

Assignment Submission
Specific submission requirements will vary depending on the assignment. Specifics for each submission will be described in class. At each due date of the assignments, students are required to submit the assignment with a high-res file of the final assignment. All files must be clearly labeled as DsGD108_Project#_FirstName_LastName.format. For example, DsGD108_Project1_John_Smith.pdf.

Revisions
Revisions and refinements are an important component of design—and learning in general. While all projects will have separate Due Dates and Letter Grades throughout the semester, all work will also need to be revised and refined at the end of the semester.

Deadlines
No extensions will be given except in cases of documented emergencies, serious illness. If such a circumstance should arise, please contact me as early as possible—before the pertinent Due Date—and be ready to provide documentation.

Late Assignments
Late assignments are subject to an F unless prior arrangements have been made. An incomplete will be granted to students with documented extenuating long-term circumstances e.g. debilitating illness, family emergency etc. On-time presentation of all preliminary roughs and final comps, as well as progress during in-class working sessions, will be noted towards participation and preparation.

Extra Credit
Out of general fairness to all students, there will be no opportunities for extra credit projects given in this class.

Classroom Protocol
This course is an essential component of your curriculum at SJSU. In order to professionally and effectively deliver the curriculum and generate work we can all be proud of, it is necessary to establish some ground rules. Students are expected to read this syllabus thoroughly and to observe all of the regulations laid out below.

— In case of an absence, you are responsible to stay on track with deadlines, assignments and anything you may have missed in class;
— Take every step necessary to minimize distractions during class. Socializing during lectures or when other students are is counterproductive and inconsiderate. Be respectful towards your classmates;
— You are expected to arrive on time and to remain in class until the class is over or excused – late arrivals and/or early departures will be always noted. If you have a prior engagement that requires you leave before the end of class, please inform me before class ends ensure you do not disturb other students when you leave.;
— Announcements, handouts, lectures and assignments are normally issued at the beginning of class. All critiques begin 15 minutes after official class start time; no work is to be added to the wall after a critique begins. It is your responsibility to inform yourself of any announcements or requirements that you miss due to late arrivals;
— In class laptops are to be used for course related purposes only. Electronic devices not directly pertaining to your participation in this class must be turned off and put away before class starts. This means you may not place or receive calls, messages, play games, surf the web, pop into Facebook, Twitter, Instagram, TikTok etc.;
— Please do not work on assignments from other classes during our class time;
— Please do not eat or drink during class and/or in the hallway;
— It is expected that there will be 4+ hours of homework for each hour of class.

A Note about Email
While I look forward to getting to know each of you over the course of the semester, it’s important for you to remember to regard your communication with me as professional communication. Here are some guidelines for professional email:

— Please address me by name. (“Hi/Hello Connie,” or “Dear Connie” are both great ways to address me. “Connie!” or “Sup C” or just jumping straight into your request without a salutation are not.)
— Please include a relevant subject in the subject line.
— I will do my best to respond to your email within 48 hours. If an email is incredibly time sensitive, indicate so in the subject line and I will do my best to respond sooner.
— I do not respond to emails over the weekend. If you email me over the weekend, I will see it on Monday morning.
— If your email takes more than 10 minutes to answer, I may ask that you come visit me during my office hours (online only), between 11am–12pm on Mondays and Wednesdays.
— Try to limit your use of casual web parlance, including communicating using emoji or gifs.
A Note about Plagiarism and Appropriation in Art & Design
A valid way to learn is to take something apart, and put it back together to figure out how it works. But with that in mind, it’s important to pay attention to times your work might be too close to your inspiration. If you present something as your own without citing the inspiration, or source, it could be considered plagiarism. Integrating what you see, what you like, and what inspires you, makes all the difference between inspiration, re-mix, appropriation, plagiarism, copying and stealing.

When you see something that inspires you, a good practice is to try to understand why it looks the way it does. What constraints was the designer working with? What kind of problem was the design responding to? What was the context? What did the design communicate, and who was it communicating to? The more we understand other designers’ processes, the more their work can help us generate ideas that fit the unique constraints of our own project. It’s highly unlikely that your project is exactly the same as someone else’s, and it’s even more unlikely that you share the same values, interests, and skills as them, and that should be reflected in your work.

Referencing another person’s work might make sense if it aligns with your concept (parody, homage, etc.). If you’re not sure, it’s best to check with me to see how to properly cite the work you’re inspired by, and how best you can make your work truly your own. If you notice heavy appropriation, let’s talk about it. If you’re not comfortable addressing your classmate directly, please speak with me, or with another graphic design faculty member so that we can check in with that student.
