

## Computer Presentation with HDMI or VGA Cable

### Turn both Monitors ON

Turn both monitors on by pressing the power button on the back of the monitors.

### Plug the HDMI or VGA Cable into Computer

For VGA, connect the VGA, audio and USB cables to your computer. Keep HDMI cable in converter.

For HDMI, disconnect the HDMI from the converter and connect it to your computer.

The picture appears on both monitors.

Volume adjustments, if needed, can be made using buttons next to power button on the back of the monitors.

### Turn both Monitors OFF

To turn the monitors off, press the power buttons on the back of the monitors.
