How to Download an App on the iPad

Below are step-by-step instructions on how to configure your SJSU Gmail on your iPad.

1. Tap the **App Store** icon from your iPad home screen.

2. You will see options for:

- **Featured:** A list of "New and Noteworthy" apps.
- **Top Charts**: A list of the most popular apps, which is divided into Top Paid Apps, Top Free Apps, and Top Grossing Apps. **Categories:** A list of Apps divided into categories such as News, Entertainment and Games.
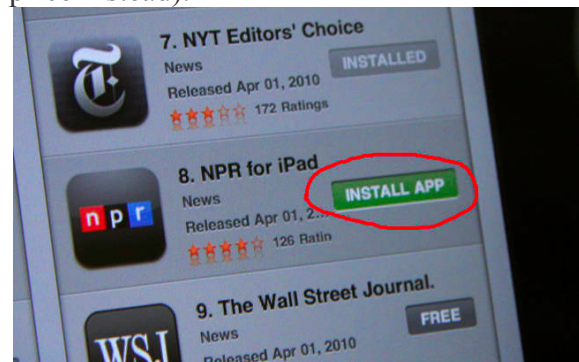

3. Pick a **free app**, e.g. NPR for iPad, WSJ etc. To immediately download it, just touch the button that says "FREE" and it will turn into a green button that says **"INSTALL APP"** (for apps that aren't free, the same button will have a price instead).

To see more details about the app, just click on the box for the app to go to a different screen. You can also download from here by tapping on the "FREE" (or price) button on the upper left.

You will need your iTunes ID and Password to download.

4. For paid apps, you can use the same account you pay with in iTunes. Otherwise, you can scroll down to the bottom of the main App Store page and click on the Account button and enter your credit card info.

5. Once you start downloading, you will be taken back to the iPad desktop and you'll see an icon of your chosen app with a progress bar below.

You can begin using the new App!
