

Turnitin Settings for Assignments

The new Turnitin LTI tool supports Originality check, GradeMark and PeerMark. This document will teach you how to adjust the assignment setting in Canvas to select whether papers will be stored in the Standard/Turnitin paper repository. eCampus recommends that you select the option, “Do not store the submitted paper” regarding the repository. Mentioned below are the instructions on how to adjust this option for your assignment in Canvas that uses the Turnitin LTI:

Edit Assignment:

1. Once you are logged into your Canvas account, go to the Assignments section and select your Turnitin assignment. After you click on the Assignment, you will be navigated to the screen as shown below. On this page, click on Settings Tab:
