Course Description:

Welcome to Econ 1B, Principles of Microeconomics! This course provides an introduction to microeconomics. Microeconomics is the branch of economics that deals with the decision making of individuals and firms. The main goal of this course is to provide students with the tools and basic understanding of microeconomic principles necessary to analyze economic phenomenon and economic policy decisions in real world situations. Topics will include, but are not limited to, the concept of scarcity, opportunity cost, gains from trade, supply and demand, elasticities, tax policies, externalities, costs, profits and various models of competition (e.g. Monopolies).

Required Material:

Homework assignments and the student companion website will help you understand the course materials and prepare you for the exams. The lowest Homework scores will be dropped. All homework assignments are handled through MyLab. Please note that MyLab will not accept late assignments (even if they are just one second late!). There are no makeup assignments. Remember, however, that your lowest scores are dropped. Please start the assignment well in advance of the deadline, so you will be able to submit them on time (even if a server goes down or another unforeseen difficulty occurs).

Finally, if you have any questions or problems with the MyLab system, you should contact their Tech supports.

**Exam Policy:**

There will be no make-ups for the exams. If you must be absent from a midterm exam and you arrange ahead of time, then you may be excused from the exam, in which case, its grading weight will be split at the instructor’s discretion among the remaining exams. This must be arranged in advance; otherwise the exam will be recorded as a zero. For the final exam, make-ups will not be allowed except in accordance with the University rules.
