

EP³: Engineering Project Partners Program

About EP³:

Turn your engineering challenge into an opportunity for innovation by sponsoring a faculty-guided SJSU **Senior Design** or **Master's project**. Student teams spend two semesters developing and evaluating solutions tailored to your organization's objectives.

Two Ways to Partner:

Company Defined Projects

You define the challenge – design & prototyping, analysis & optimization, or AI-enabled engineering – faculty ensure academic fit.

Faculty-Curated Projects

You share your interests; faculty design the project. This option is especially helpful to teams with little time to scope a student project.

Program Costs

- **Undergrad Projects:** \$5,000 - \$10,000
- **Graduate Projects:** \$10,000 - \$25,000

Duration: 2 Semesters (8-months)

- Projects can begin in August, January, or June.
- Projects may have NDA and IP arrangements.
