CoE RTrack Web-Based App

"RTrack" is a web-based app for CoE faculty to report online their yearly research (RSCA) achievements. It may be accessed at <https://rtrack.cmpe.sjsu.edu>. The User-Name and password are those used to access SJSU One.

If connecting from off campus, you need to connect securely via VPN. Instructions for VPN download, install, and setup are posted at <http://www.sjsu.edu/it/services/network/vpn/index.php>. Make sure to disable 'Block Pop-Up Windows' in your browser.

RTrack will track the yearly CoE faculty publication and grant (RSCA) achievements required to complete the CoE RSCA metric data part of your first-time application to the University Faculty Assigned Time Program and subsequent yearly updates.

If you use TeX or LaTeX and have information about your publications stored in BibTeX format, you can port the information to automatically populate much of the RTrack forms. Use the BibTeX field at the top of the RTrack forms to do so. Leave the BibTeX field blank otherwise.
