2022 Internship

Environmental Stormwater Internship

The West Valley Clean Water Program Authority is hiring an environmental stormwater intern that is interested in real work experience in environmental program management and is passionate about the environment and water quality protection. The position supports analytical and business administration, outreach campaigns & community and school engagement projects, field assessments and a wide variety of environmental projects.

The ideal candidate is organized, works independently, is detail-oriented, and is a good communicator. The internship runs April – September 2022 with a commitment of up to 10 hours a week at $18-20/hour. Applications are open until filled.
