SolPods is looking for a Fall & Spring intern - approximately 8–10 hours per week. Your activities will include:

- Research and identify (free and paid) sustainability workshops/short courses/training programs offered by universities, junior colleges, professional associations, non–profits, and online platforms (LinkedIn, Masterclass); including pricing models.
- Create workflow of key and sub–topics that could be used as a basis for creating a curriculum for a chronological set of workshops for individuals to learn more about sustainability best practices and actions individuals can take to be more sustainably minded.
- Identify topics by industry/sector and related curriculum that could be used as a basis for training businesses to educate and engage professionals on day to day sustainability practices in the workplace.
- Establish a plan to identify, recruit and partner with sustainability practitioners and create a template that can scale these efforts.
- Research the STARS sustainability standards for higher education and present to SolPods team – https://stars.aashe.org
- Students can earn up to 3 units of academic internship credit for their work (work will start Fall semester and extend into Spring semester when the 3 units will be applied).

Why work for SolPods?

You’re passionate about sustainability. SolPods is an up and coming sustainability community that aims to connect change–makers across the globe. If you want to help the planet, you’ll be a great fit.
You’re a self-starter. SolPods is a startup, which means we are building from the ground up every day. We are looking for someone who takes initiative and loves to share their opinions and insights!

You love collaborating with a team. At SolPods, we take pride in our ability to put ideas into action through brainstorm sessions and engaging team meetings. If you want to work with a lively group of people, SolPods is for you.

What we do

We are a sustainability-minded community with a platform aimed to educate, engage and promote action across the globe. We aim to offer professional and personal training and workshops to provide our community with a deeper education on sustainability topics.

Why SolPods

We are a female-founded firm with a passion for sustainability. We are dedicated to helping people achieve their sustainability goals while growing their business. We have a decade of combined experience in sustainable finance educating our clients on the United Nation's Sustainable Development Goals.

Our team

After several years of working in sustainable and impact investing, we were determined to make a broader impact towards sustainable development. We wanted to become a bigger part of the solution, hence why we founded SolPods: giving people a platform to demonstrate their commitment to helping better our world. Our goal is to unite people on their journey to finding their long-term purpose. The founding team includes: Amy Farrell, Cassie Freyeisen, Lucy Callender and Amy Sabik.

Our vision
We believe inspiring actions can have a repeat effect, especially when you have the strength of an empowering community. Hence, SolPods was created: a platform that sparks new ideas, making a positive impact for the planet and for future generations.
