San José State University
Environmental Studies Department, College of Social Sciences
ENVS 173, Forest Ecology and Conservation, Fall 2023

Instructor: Dr. Will Russell
Office Location: Washington Square Hall 115E
Office Hours: Tuesday 9:30-10:30 (by appointment)
Email: will.russell@sjsu.edu

Class Days/Time: This class will meet every Friday at a field location from 10:30 am until approximately 4:00 pm
1st class 8/25 will meet in DMH 353

Prerequisites: ENVS 01 and ENVS 10, or upper division standing

“Any fool can destroy trees. They cannot defend themselves or run away.” – John Muir

Catalog Description
A field-based course designed to provide students with the conceptual framework and practical tools necessary for understanding the ecology and conservation of local forest ecosystems. Topics covered include forest restoration, succession, wildlife, diversity, natural and human disturbance, and the history of forest management.

Prerequisite: ENVS 01, ENVS 10, or upper division standing.

Misc/Lab: Lecture 3 hours/lecture 2 hour/lab.

Course Overview
This course is designed to provide students with the conceptual framework and practical tools that are necessary for understanding the ecology and management of forests. Through this course, students will gain an understanding of basic forest ecology; disturbance and succession; forest community interaction; natives, endemics; invasive exotic species; and local variation of species and community types. In addition, the course will focus on historical and current forest management practices; impacts of timber management on forest ecosystems; and forest restoration. Field observation, and hands-on field techniques will be emphasized.
**Required Materials**

**Textbooks and other Materials**
- Various journal articles available on Canvas.
- **Field Notebook**  Spiral or hardbound notebook for: field activities and quizzes, daily plant list, drawings and descriptions of all plants (and other organisms) identified in the field, notes from all field lectures (including those by guest speakers).

**Field Trips**
All field trips will take place on Friday’s beginning at 10:30 am and will continue well into the afternoon, and may require moderate to strenuous hiking to reach field sites.

**Transportation**
Most of our field trips will take place in the Santa Cruz Mountains 60-90 minutes from San Jose State. Transportation to field sites will be the students’ responsibility. Please be aware that there are parking fees required ($10-15 per-car) at some of the sites.

**Wilderness Preparation and Etiquette**

**To-do List**
1. Always be on time – we will be leaving for our hikes promptly, and will not be waiting for stragglers.
2. Wear comfortable walking shoes and weather appropriate layered clothing.
4. Bring a field notebook, pens, plant guides, camera, etc.
5. Carry any medications or first-aid supplies that you might need on the trail (EpiPen, band-aids for blisters, etc.).
6. Be respectful of other park visitors at all times.
7. Be prepared to help/support your classmates when necessary.
8. Let the professor know if you need any physical accommodations regarding the field trips.
9. Have fun, hug a tree, kiss a slug, learn a lot, etc.

**Do-not-do List**
1. Do not pee in the creek!
2. Do not drink water from the creek (see #1)!
3. Do not eat any berries, mushrooms, or other forest organisms without explicit instructions from the instructor!
4. Do not approach wildlife (deer, skunks, yellow jackets, rattlesnakes, etc.)!
5. Do not cut trail!
6. Do not play amplified music in the wilderness.
7. Do not make personal phone calls during field trips.
8. Do not harass people in your carpool!
9. Do not experiment with mind-altering substances during the field trips. Save the party for later – we need to keep our wits about us!

Course Requirements and Assignments

Weekly Quiz
There will be a short quiz on the week’s readings on Canvas.

Home Lab Exercises
Occasional Home lab exercises will be required with directions and a discussion on Canvas. Complete and upload your assignment by the end of the week, and engage in dialog with your classmates through the discussion.

Field Activity
Each class meeting in the field will include a formal activity and/or plant quiz. Results of the field activity should be turned in at the end of the day.

Field Presentation: Species Description and Fact Sheet
Students will work in groups of 2-3 to conduct research on an organism of their choice that lives in the Santa Cruz mountains, and present an oral 10-15 summary in the field. The summary will include the ecology, life history, evolutionary history, habitat requirements, and distribution of the species. A 1-2 page (single spaced 12 point type) synopsis on the organism will be uploaded to Canvas, and will include a title with the species’ name (common and scientific), and at least five academic references in APA style. You may use written notes in the field while presenting, but may not use your phone!

Field Exam:
A final field exam will be given in the field focused on the identification of plant species, but may include other site-specific material as well.

Final Content Exam:
A final exam on readings and concepts covered in the course will be given in on Canvas.

Class Participation:
Attendance on all field trips is an essential part of the class. Please be respectful of your classmates by listening quietly when the instructor, guest speakers, or student presenters are speaking. We are a big group, often on a narrow trail, it is very difficult for students to hear when extraneous conversations are competing. Please do not come to class if you have a fever or feel like you might be getting sick!
Grading
Your grade in this course will be based on field assignments, online quizzes, group presentations, and the final exams. See chart below.

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Field Assignments and Home Lab Exercises</td>
<td>20</td>
