**Course Description**

The relationship between humans and the environments around them are consistently changing. The field of environmental studies is engaged in understanding the causes, dynamics, and solutions to environmental problems. In this course students will learn about a wide array of environmental topics, engage with critical readings and discussions on these issues as well as the scientific research, activism, and policy action that communities in the U.S. and around the world are engaging in to promote environmental justice and sustainability.

**Course Learning Outcomes (CLO)**

This course has four main learning objectives, which include, 1) learning about important environmental problems, 2) the relationships between humans and their surrounding environments, 3) the research around these problems and relationships, and 4) ways in which individual and collective actions can help solve environmental problems and create more sustainable futures.

Upon successful completion of this course, students will be able to:

1. Understand and explain key environmental issues.
2. Analyze the interrelationships between resource use, economics, politics, social justice, and environmental degradation.
3. Identify social, political, and technical solutions that will guide change towards more sustainable communities today, and in the years to come.

**GE Learning Outcomes (GELO)**

This course fulfills the following General Education Learning Outcomes (GELO):

1. Place contemporary developments in cultural, historical, environmental, and spatial context.
2. Identify the dynamics of ethnic, cultural, gender/sexual, age-based, class, regional, national, transnational, and global identities and the similarities, differences, linkages, and interactions between them.

3. Evaluate social science information, draw on different points of view, and formulate applications appropriate to contemporary social issues.
4. Apply multidisciplinary material to a topic relevant to policy and social action at the local, national, and/or international levels.

## Course Requirements and Assignments

Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of 45 hours over the length of the course for preparation/studying, or course related activities. For this 3-unit course, that averages out to about 6 hours a week of work not including class time. More details about student workload can be found in [University Policy S12-3](https://sjsu.edu/senate/docs/S12-3.pdf) at [sjsu.edu/senate/docs/S12-3.pdf](https://sjsu.edu/senate/docs/S12-3.pdf).

Please read the following assignment descriptions carefully. Failing to comply with the specific directions given below will result in a loss of credit points for each assignment.

### 1. Participation (20 points total)

Your participation grade is determined by your active participation during class. This means that you participate in the in-class activities by fostering discussion with your classmates and answering questions, participating in class-wide discussions, asking questions, and being present during class time. Your grade will be determined by 2 factors: turning in *in-class assignments*, and your *in-class participation*.

- 50% in class assignments (10 points)
- 50% in class discussion participation (10 points)

NOTE that Attendance is not part of your grade evaluation per [University policy F69-24](https://sjsu.edu/senate/docs/F69-24.pdf) at [sjsu.edu/senate/docs/F69-24.pdf](https://sjsu.edu/senate/docs/F69-24.pdf) states that “Students should attend all meetings of their classes, not only because they are responsible for material discussed therein, but because active participation is frequently essential to insure maximum benefit for all members of the class. Attendance per se shall not be used as a criterion for grading.”

### 2. Two Exams (50 points total)

### 3. Position Papers (15 points total)

Position papers are based on insights gained from readings, videos, lecture, and discussions. The objective of the position paper is to provide an opportunity for students to discuss different “perspectives” on a given environmental issue. Students will be required to write 3 short papers (2-3 pages double-spaced) based on questions associated with different topics. You will be provided with 10 possible topics, but you will write a paper on **only 3** topics. A grading rubric will also be posted on Canvas. Each paper will:

- use valid science and social science data in the analysis of the issues.
- characterize the environmental issue and how it has occurred.
- provide feasible and necessary solutions to move toward sustainability on this issue.

### 4. Online Discussions (10 points total)

Over the course of the semester, weekly writing assignments (~100 words each) will be submitted via Canvas and focus on topics for the week. Your post should demonstrate that you have done the readings, paid attention in lecture, and understand the material. Your post is due by Tuesday at 12 pm each week. You should respond to the ideas of ONE classmate in your Canvas Discussion Group by Thursday at 12 pm each week. Participation in online discussions will be evaluated by these two categories, and the full rubric will be uploaded to Canvas.

A. The original post will:

- Address the discussion question(s),
  - Use at least one quote from the reading,
  - Be at least 100 words.
- B. The response posts will:
- Respond thoughtfully and respectfully to the ideas presented by your peer,
  - Include a response that agrees, disagrees, or presents a new idea to that of the original post,
  - Be at least 50 words.

## **Classroom Protocol**

While we will agree on community “ground rules” together on our first day of class, here are some basic expectations I have that will help us make the most of our time in class:

- Come prepared to class by thinking seriously about what you have read.
- Do not be hesitant to ask a question.
- Respect confidentiality and privacy in our classroom community.
- For class, please turn off cell phone and technology distractions\*
- Refrain from any side-talk, reading non-class material, this is disrespectful.

## **Tips for Success**

- ✓Read the syllabus carefully, and write down the exam dates and the due dates for assignments in your calendar.
- ✓Take notes in lecture and discussion.
- ✓Keep up with the readings. Lecture and discussion will not make sense unless you have done the readings. You should expect to spend about 3 hours outside of class each week on required reading (not including assignments), ideally in a couple of uninterrupted sessions.

## **University Policies**

### **Campus Policy in Compliance with the American Disabilities Act**

If you need course adaptations or accommodations because of a disability, or if you need to make special arrangements in case the building must be evacuated, please register with the Accessible Education Center. [Presidential Directive 97-03](http://sjsu.edu/president/docs/directives/PD_1997-03.pdf) at [sjsu.edu/president/docs/directives/PD\\_1997-03.pdf](http://sjsu.edu/president/docs/directives/PD_1997-03.pdf) requires that students with disabilities requesting accommodations must register with the [Accessible Education Center](http://sjsu.edu/aec) (AEC) at [sjsu.edu/aec](http://sjsu.edu/aec) to establish a record of their disability.

### **General Expectations, Rights and Responsibilities of the Student**

As members of the academic community, students accept both the rights and responsibilities incumbent upon all members of the institution. Students are encouraged to familiarize themselves with SJSU’s policies and practices pertaining to the procedures to follow if and when questions or concerns about a class arises. See [University Policy S90-5](http://sjsu.edu/senate/docs/S90-5.pdf) at [sjsu.edu/senate/docs/S90-5.pdf](http://sjsu.edu/senate/docs/S90-5.pdf). More detailed information on a variety of related topics is available in the [SJSU catalog](http://info.sjsu.edu/web-dbgen/narr/catalog/rec-12234.12506.html), at <http://info.sjsu.edu/web-dbgen/narr/catalog/rec-12234.12506.html>. In general, it is recommended that students begin by seeking clarification or discussing concerns with their instructor. If such conversation is not possible, or if it does not serve to address the issue, it is recommended that the student contact the Department Chair as a next step.

## Dropping and Adding

Students are responsible for understanding the policies and procedures about add/drop, grade forgiveness, etc.

- Refer to the current semester's [Catalog Policies](http://info.sjsu.edu/static/catalog/policies.html) section at <http://info.sjsu.edu/static/catalog/policies.html>.
- Add/drop deadlines can be found on the current academic year calendars document on the [Academic Calendars webpage](http://sjsu.edu/provost/services/academic_calendars) at [sjsu.edu/provost/services/academic\\_calendars](http://sjsu.edu/provost/services/academic_calendars).
- The [Late Drop Policy](http://sjsu.edu/aars/policies/latedrops/policy) is available at [sjsu.edu/aars/policies/latedrops/policy](http://sjsu.edu/aars/policies/latedrops/policy).
- Students should be aware of the current deadlines and penalties for dropping classes. Information about the latest changes and news is available at the [Advising Hub](http://sjsu.edu/advising) at [sjsu.edu/advising](http://sjsu.edu/advising).

## Consent for Recording of Class and Public Sharing of Instructor Material

[University Policy S12-7](http://sjsu.edu/senate/docs/S12-7.pdf), [sjsu.edu/senate/docs/S12-7.pdf](http://sjsu.edu/senate/docs/S12-7.pdf), requires students to obtain instructor's permission to record the course:

- Common courtesy and professional behavior dictate that you notify someone when you are recording him/her. You must obtain the instructor's permission to make audio or video recordings in this class. Such permission allows the recordings to be used for your private, study purposes only. The recordings are the intellectual property of the instructor; you have not been given any rights to reproduce or distribute the material.
- Course material developed by the instructor is the intellectual property of the instructor and cannot be shared publicly without his/her approval. You may not publicly share or upload instructor generated material for this course such as exam questions, lecture notes, or homework solutions without instructor consent.

## Academic Integrity

Your commitment, as a student, to learning is evidenced by your enrollment at San Jose State University. Faculty members are required to report all infractions to the office of Student Conduct and Ethical Development. The [Student Conduct and Ethical Development website](http://sjsu.edu/studentconduct) is available at [sjsu.edu/studentconduct](http://sjsu.edu/studentconduct).

Plagiarism, intentional or not, will not be tolerated in this course. This is a course designed to provoke critical thought and writing, and plagiarism will not help you become a better thinker or writer. For an extensive read of the University guidelines for dealing with plagiarism, see the [University Academic Integrity Policy S07-2](http://sjsu.edu/senate/docs/S07-2.pdf) at [sjsu.edu/senate/docs/S07-2.pdf](http://sjsu.edu/senate/docs/S07-2.pdf).

Here is an idea of what plagiarism looks like. You are plagiarizing or cheating if you:

- For written work, copy anything from a book, article or website and add or paste it into your paper without using quotation marks and/or without providing the full reference for the quotation, including page number
- For written work, summarize / paraphrase in your own words ideas you got from a book, article, or the web without providing the full reference for the source (including page number in the humanities)
- For an oral presentation, copy anything from a book, article, or website and present it orally as if it were your own words. You must summarize and paraphrase in your own words, and bring a list of references in case the professor asks to see it
- Use visuals or graphs you got from a book, article, or website without providing the full reference for the picture or table
- Recycle a paper you wrote for another class
- Copy off of a classmate, or use someone else's work as your own

- Use technology or smuggle in documents to obtain or check information in an exam situation

In a research paper, it is always better to include too many references than not enough. When in doubt, always err on the side of caution. If you have any question or uncertainty about what is or is not cheating, it is your responsibility to ask your instructor.
