1. Select the SJSU_Guest connection from your device’s Wi-Fi connection list.
2. Under SJSU_guest, click **Connect**
   a. If prompted, select that this is a **Public (unsecured) network**
3. To verify if your device is connected to SJSU guest
   a. On a Windows laptop - Go to Command Prompt, and enter “ipconfig /all”. Look for the “Wireless LAN adapter Wi-Fi” section. The IPv4 Address should start with 10.251.x.x, where x varies from device to device.
   b. On an iPhone - Go to Settings, then Wi-Fi. Click the and scroll down to IPv4 address section. The IPv4 Address should start with 10.251.x.x, where x varies from device to device.
