Course Description and Overview

This course will engage the student in an analysis of the nature and extent of crime, including causation and prevention. Students will become more informed critics and analysts of the world of crime and delinquency. Descriptions of offenses, criminal typologies and victim surveys will be explored. Students will also undertake an evaluation of various control and prevention strategies.

As a student of criminal justice, there exists the need to develop the ability to better interpret the changing world of crime, become a more informed citizen, and be better prepared to enter the professional world of criminal justice. The study of crime and delinquency is not limited to the often emphasized legal and crime-control ideologies; while necessary and important, the study of theory, method, and criminal behavior are integral parts of developing effective social policy. Throughout this course, students will be engaged in well-rounded analysis of crime and delinquency.

Course Goals and Student Learning Objectives

Upon successful completion of this course, students will be able to:

- LO1** Demonstrate substantive knowledge about method, where data on crime comes from, and its utility in study of crime and delinquency. Satisfaction of this learning objective will be measured through the evaluation of class discussion, a midterm examination, final examination, research paper, and paper presentation.
- LO2** Demonstrate substantive knowledge of, and be able to evaluate and apply a variety of theories to explain why crime and delinquency take place. Satisfaction of this learning objective will be measured through the evaluation of class discussion, a midterm examination, final examination, research paper, and paper presentation.
- LO3** Objectively analyze the various types of criminal offenses and delinquent behavior through the blended study of theory and method. Satisfaction of this learning objective will be measured through the evaluation of class discussion, a midterm examination, final examination, research paper, and paper presentation.
