JS Reading and Writing Philosophy

The Department of Justice Studies is committed to scholarly excellence. Therefore, the Department promotes academic, critical, and creative engagement with language (i.e., reading and writing) throughout its curriculum. A sustained and intensive exploration of language prepares students to think critically and to act meaningfully in interrelated areas of their lives—personal, professional, economic, social, political, ethical, and cultural. Graduates of the Department of Justice Studies leave San José State University prepared to enter a range of careers and for advanced study in a variety of fields; they are prepared to more effectively identify and ameliorate injustice in their personal, professional and civic lives. Indeed, the impact of literacy is evident not only within the span of a specific course, semester, or academic program but also over the span of a lifetime.

Course Goals and Student Learning Objectives

Students will gain a basic understanding of drugs, drug classifications, and identification of drug use. Students will become familiar with current and the history of drug trends, crimes and impact. Analysis of theories of drugs to further understand drug law violations and current legal issues. Analysis of the criminalization, decriminalization, legalization and harm reduction approaches in the system. Through institution tours, interviews and/or court observation students will gain a greater understanding of the strengths and weaknesses of the system. Students will also gain an understanding of all system partners involved that serve those who are impacted by drugs while gaining an understanding of the professional duties of each position.

Upon successful completion of this course, students will be able to:

LO1 Students should gain a theoretical understanding of the social construction of deviance, normalcy, and crime. They should be able to define and apply these concepts in the interpretation of current events and social phenomena.

LO2 Students should gain a reasonable (empirical) understanding of the development of the US and global “war on drugs.” Specifically, students should be able to discuss and recognize the key “moral entrepreneurs,” private interests, and public stakeholders involved in the creation and perpetuation of the drug war.

LO3 Students should be able to explain the historical and contemporary connections between criminalization of illicit substances and the oppressive (by definition) systems of racism and capitalism.

Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of forty- five hours over the length of the course (normally 3 hours per unit per week with 1 of the hours used for lecture) for instruction or preparation/studying or course related activities including but not limited to internships, labs, clinical practica. Other course structures will have equivalent workload expectations as described in the syllabus.
