OVERVIEW OF THE DOCTORATE PROGRAM

The Entry Level Occupational Therapy Doctorate program is designed for students who have earned a baccalaureate degree in a discipline other than occupational therapy. Our students are educated with a focus on effectively using current evidence, creating new professional knowledge through research, and contributing to program development in both traditional and emerging areas of practice. The OTD Program at San Jose State University has full WSCUC approval and is awaiting ACOTE approval. We have a long history, over 60 years, of providing exemplary graduate occupational therapy education and have the distinction of being one of the first in the nation to offer a Master's of Science degree in Occupational Therapy. **We are proud to offer the first Occupational Therapy Doctorate program at a public institution in California.**

The Program anticipates attaining its full accreditation in May 2025.
