

## Math 42      Homework Assignments

Unless I tell you otherwise, homework assignments will be given on Thursdays. You have one week to finish the assignment. In other words, for each assignment posted on a Thursday, it is due at the beginning of class the next Thursday.

To see the assignment, go to <http://www.sjsu.edu/people/ho-kuen.ng/> , follow the Courses link at the top, and go to Math 42.

Each time, my grader and I will choose a few problems for grading. In other words, not all problems will be graded. Each homework assignment is worth a maximum of 20 points. If the graded problems total  $< 20$  points, the balance will be given for completeness, i.e., how close you are to finishing the entire assignment.

**Please arrange your solutions in order, and staple all the pages together before you give them to me.** Explain your work and reasoning. Do not ask my grader and me to guess. We always guess wrong, and so you will not get credit.

Submission by e-mail will **NOT** be accepted. Late homework assignments will **NOT** be accepted.

You are encouraged to work together and discuss with other classmates on your homework. But the work that you hand in **MUST** be your own. Please read and understand the definitions and consequences of academic dishonesty.
