(Don’t worry polar bear! Logic is fun!)

Need to fulfill your B4 requirement? Want to make progress towards your philosophy degree at the same time? Want to boost your scores on the GMAT or LSAT? Take logic!

This course surveys basic concepts and methods in mathematical logic, focusing on syntax, semantics, and formal proof. Some emphasis will be placed on using these concepts in standardized testing, in philosophy, and in everyday life.

This course has no prerequisites, and satisfies the B4 lower-division GE requirement.

Also Available for ALL 009 students: PHIL 09W – Math and Logic Workshop!
New 1-unit course offering extra help and support learning logic!!
Wednesdays, 4 30 – 5 20, DMH 208 (Section 01, Smith)

Spring Term, 2023
