(now with added polar bear!)

Need to fulfill your B4 requirement? Want to make progress towards your philosophy degree at the same time? Just want to boost your scores on the GMAT or LSAT? Consider taking logic!

This course will be a survey of basic concepts and methods in logic, focusing on mathematical logic, and formal proof. Some emphasis will be placed on using these concepts in standardized testing, and in philosophy in general.

This course has no prerequisites, and satisfies the B4 lower-division GE requirement.

Also Available for ALL 009 students: PHIL 96L – Logic Workshop!
