

I love the friendly atmosphere of the campus, and the academic freedom of pursuing my own research. I also appreciate the opportunity to interact with graduate students from whom I learn a lot. – **Wasin So**

I love challenges and facing them in a constructively engaging way; SJSU has engaged me to have both. – **Bo Mou**

I enjoy teaching and research at SJSU because:

- A good balance between teaching and research
- Diverse workforce (faculty & staff) and student body
- Opportunities to mentor diverse ethnic students
- Contemporary and hands-on Engineering curricula
- Opportunities to collaborate with high tech companies in Silicon Valley
- Center for innovation and new technology development – **Raymond Yee**

I started at SJSU in 1998 and, since then, I have witnessed the campus evolve and make improvements. Granted, there is always work to be done, but I love the progress I have seen and the trajectory of SJSU working on its commitment to equity and access for students that have historically faced institutional barriers over many years. – **Jesus Covarrubias**
