Course and Contact Information

Instructor: Dr. Christina Tzeng
Office Location: Virtual for Fall 2020
Telephone: N/A for Fall 2020
Email: christina.tzeng@sjsu.edu
Office Hours: Wednesday 9:30 AM – 11:30 AM, or by appointment
Class Days/Time: Tuesday/Thursday 9:00AM – 10:15AM with live/synchronous sessions via Zoom on Thursdays only from 9:00AM – 10:15AM PST. We will not be meeting as a class on Tuesdays. See Course Format section below for further details.
Classroom: See Canvas for Zoom link
Prerequisites: PSYC 001 (General Psychology)

Course Description

One of our most exciting and enduring intellectual quests is understanding how the human mind works. To understand the human mind, we must understand cognition, or how we perceive, think, communicate, understand, learn, and remember. In this course, we will see where the field of cognition came from, the scientific methods that are used to study the mind and brain, what the different components of cognition are, and how these different abilities support our interactions in and with the world around us.

From SJSU Course Catalog: The activity of knowing: acquisition, organization and use of knowledge. Processes involved in that activity, including perception, memory, thinking and language. Prerequisite: PSYC 001.

Course Format

This is an online course with both synchronous and asynchronous components. Each week on Thursdays only from 9:00AM – 10:15AM, we will be using Zoom for our synchronous class sessions. During these sessions, we will engage in content-related discussion and activities. Office hours will also be held virtually via Zoom (see Course Policies section below). Asynchronous activities will include viewing pre-recorded lectures, reading assigned textbook pages, and completing homework assignments and exams.

Canvas

All course content, such as the syllabus, lectures, assignments, grades etc. will be on the Canvas Learning Management System course website at http://sjsu.instructure.com. You are responsible for regularly checking Canvas for course announcements and updates.
Program Learning Outcomes (PLO) & Course Learning Outcomes (CLO):
Upon successful completion of this course, students will achieve the following CLOs (in bullet points):

**PLO1. Knowledge Base of Psychology:** Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.

- **CLO1.** Demonstrate knowledge of the different components of cognition, including perception, attention, memory, language, and decision making
- **CLO2.** Identify the processes that underlie cognitive psychology phenomena

**PLO2. Research Methods in Psychology:** Students will understand basic methodological approaches used in psychology, including research design, analysis, and interpretation.

- **CLO3.** Describe different research methods used in cognitive psychology research
- **CLO4.** Infer appropriate conclusions from cognitive psychology research
- **CLO5.** Communicate findings and implications from cognitive psychology research

**PLO3. Critical Thinking Skills in Psychology:** Students will understand and be able to use critical and creative thinking, skeptical inquiry, and a scientific approach to address issues related to behavior and mental processes.

- **CLO6.** Synthesize evidence in favor of arguments pertaining to debates in cognitive psychology
- **CLO7.** Evaluate and criticize arguments pertaining to issues in cognitive psychology

**PLO4. Application of Psychology:** Students will understand and be able to apply psychological principles to individual, interpersonal, group, and societal issues.

- **CLO8.** Articulate how concepts in cognitive psychology apply to their everyday lives

**PLO5. Values in Psychology:** Students will value empirical evidence, tolerate ambiguity, act ethically, and recognize their role and responsibility as a member of society.

- **CLO9.** Respect the relative nature of empirical evidence
- **CLO10.** Recognize the value of intellectual curiosity and skepticism

---

**Required Textbook**

*An electronic version of this textbook can be rented for the semester (or purchased) online. Please be sure to purchase the 5th edition of the book, as page numbers and content differ across editions.*
Course Requirements and Assignments

Asynchronous Components

Readings & Pre-recorded Lectures
Students are responsible for thoroughly reading all assigned chapters and for viewing all pre-recorded lectures. Students must complete assigned readings and lecture viewings before the start of each synchronous class session. Lectures will not cover everything in the readings, but exams and homework will include both lecture and reading materials.

Homework (40%)
Students will complete 11 homework assignments (one each week), each worth 10 points. Research suggests that frequent opportunities for students to think critically about course content enhances both the quality of their learning and their ability to self-regulate their study habits (e.g., Kitsantas & Zimmerman, 2009).

Homework assignments will assess your understanding of the material covered in the lectures and assigned readings. The purpose of these homework assignments are to (1) encourage you to complete readings and lecture viewings in a timely manner, and (2) ensure that you are prepared to participate meaningfully each week during our Thursday synchronous sessions. I will drop your two lowest homework scores.

Exams (40%)
Students will complete three exams, all non-cumulative and open-book. Open book exams have been found to encourage meaningful engagement with the material but induce lower levels of student anxiety than with closed-book exams (e.g., Gharib, Phillips, & Mathew, 2012).

Please note that exams will be time-limited such that you will need to study. Students are responsible for all material covered in lecture and assigned readings. Exams will include multiple-choice questions and short essay questions and will be conducted online on Canvas.

Each exam will be made available for a 24-hour window to allow for flexibility. Students will have one attempt for each exam and one begun, must complete the exam within a two-hour window. The purpose of these exams is to assess your ability to not only understand course concepts, but also to think critically about them in the context of existing research, and apply knowledge of the concepts to real-life events.

Final Project (20%)
Students will be asked to either (1) create a podcast or video or (2) write a paper explaining a major concept in cognitive psychology and how it applies to their own lives. Students will be asked to explicitly discuss the underlying mechanisms or theories underlying the chosen phenomenon and explain how a particular event or experience in your own life embodies the course concept. The purposes of this project are to have you (1) articulate the ways in which cognition underlies your everyday experiences and (2) practice communicating these to a broad audience.

Extra Credit
There will be three opportunities to earn extra credit throughout the semester (one extra credit assignment per module). Opportunities for extra credit will be presented without notice only to those present during specific synchronous sessions. Students can earn a maximum of two points to be added to each of the three exams.
Synchronous Components

As mentioned above, we will be holding synchronous sessions via Zoom on Thursdays only from 9:00AM – 10:15AM PST. Prior to each synchronous session, you will have completed a corresponding chapter reading and homework assignment. During synchronous sessions, we will be engaging as a class with the course material. This will take many forms, including small-group discussions about relevant empirical findings, demonstrations of phenomena in cognitive psychology, debates about contradictory theoretical views, and exploration of cognitive psychology concepts in the real world.

Note on Attending Synchronous Sessions

- Synchronous sessions will be recorded and posted each week on Canvas. However, a large portion of synchronous sessions will be devoted to small group discussions in breakout rooms, which are not recorded. Viewing the posted recordings of the Thursday synchronous sessions are not meant to be a substitute for attending class.

- Attending the weekly synchronous session is strongly encouraged. Much research suggests that class attendance is a better predictor of college grades than any other known predictor of academic performance, including high school GPA and standardized test scores (Credé, Roch & Kieszczynka, 2010). Data gathered from SJSU students suggests that attending synchronous sessions:
  
  1. helps students feel more accountable for their studies  
  2. helps them stay on track with course material  
  3. makes students feel more engaged with course content, their peers, and the instructor  
  4. allows them the opportunity to ask questions and receive an immediate response

All of these are factors that led to a more positive class experience. Please see the Virtual Classroom Protocol section below for further details about expectations for synchronous sessions.

Additional University-Wide Information on Course Requirements

Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of 45 hours over the length of the course (normally three hours per unit per week) for instruction, preparation/studying, or course related activities, including but not limited to internships, labs, and clinical practica. Other course structures will have equivalent workload expectations as described in the syllabus.

Please review the following sources and policies, as well:

- Office of Undergraduate Education’s Syllabus Information web page at [http://www.sjsu.edu/gup/syllabusinfo/](http://www.sjsu.edu/gup/syllabusinfo/)
Grading Information

Final Letter Grade Scale:

</table>

Course Policies

1. Percentage grades on or above the 0.5 percentage mark will be rounded up to the next percentage (e.g., a 92.5% will be rounded up to a 93%).

2. I will not change final grades unless there is a clerical error in the calculation of your grade.

3. There is built-in flexibility to account for difficulties you might encounter over the course of the semester (i.e., you will be able to drop your lowest two homework scores, and you can choose when within a 24-hour window to complete your open-book exams). You are encouraged to use this flexibility when you can anticipate setbacks to completing your coursework.

   If you encounter an unexpected emergency outside of your control (e.g., COVID infection, eviction from your home, daycare closure, etc.) and you would like to request extension on an assignment, please email me with as much notice as possible in advance of the assignment deadline. Although contacting me does not guarantee that your request will be approved, know that I take all requests seriously and will work with you to find appropriate resources and a path forward for completing your coursework.

   Please note that my flexibility with respect to deadlines relates to emergencies beyond your control, and that this flexibility does not apply to vacation travel, conflicts with your work schedule, or other foreseeable circumstances that are within your control. I expect you to act ethically and honorably and not to take advantage of the current global crisis.

4. Office hours: Please take advantage of office hours to speak with me about anything related to this course, your research or career interests, or anything else that I may be able to help with. The more I know about how my students are doing and what they are thinking, the better I can ensure that the course will be an engaging and interesting experience. Please book an appointment online at https://christina-tzeng.youcanbook.me if you want to meet with me. If you cannot make my weekly office hours, please email me to schedule an appointment.

5. Academic integrity: Cheating, plagiarism, or other forms of academic dishonesty will not be tolerated. You are expected to work independently on all homework assignments, exams, and papers. Any course material that is posted on Canvas (pre-recorded lectures, recordings of synchronous sessions, exams, homework assignments, paper assignments are for your own private, educational purposes and cannot be shared.

   If I find evidence of academic misconduct (e.g., working with another student on assignments or exams, posting any course material online), you will receive a zero on the assignment(s) in question, and I will file a report with the Office of Student Conduct and Ethical Development. Please visit the office’s website for more information at https://www.sjsu.edu/studentconduct/policies/.
Virtual Classroom Protocol

Please see Module 0 on our course Canvas site for detailed information about the following:

- technology requirements (e.g., hardware, software, etc.)
- technology resources (e.g., tutorials on how to use Zoom and Canvas)
- guidelines for synchronous sessions (e.g., expectations for cameras and microphones)
- guidelines for online submission of assignments and exams
- student resources for academic, financial, and health support

Statement of Inclusion and Diversity

We all have diverse personal experiences, identities, and values that bias how we view the world. I hope that we can embrace this diversity and work together to ensure each student feels like a valued member of the learning community. It is my intent to present materials and activities that are respectful of diversity: gender, sexuality, disability, age, socioeconomic status, immigration status, ethnicity, race, and culture. It is also my intent that students from all backgrounds and perspectives be well served by this course, that students’ learning needs be addressed both in and out of class, and that the diversity that students bring to this class be viewed as a resource, strength, and benefit.

Accommodations

If you need course adaptations or accommodations because of a disability, or if you need special arrangements in case the building must be evacuated, please make an appointment with me as soon as possible, or see me during office hours. Presidential Directive 97-03 requires that students with disabilities requesting accommodations must register with AEC to establish a record of their disability. Academic Senate Policy F06-2 at https://www.sjsu.edu/aec/docs/F06-2.pdf

University Policies

Per University Policy S16-9 (http://www.sjsu.edu/ senate/docs/S16-9.pdf), relevant university policy concerning all courses, such as student responsibilities, academic integrity, accommodations, dropping and adding, consent for recording of class, etc. and available student services (e.g. learning assistance, counseling, and other resources) are listed on Syllabus Information web page (http://www.sjsu.edu/gup/syllabusinfo), which is hosted by the Office of Undergraduate Education. Make sure to visit this page to review and be aware of these university policies and resources.
