Course Canvas Site

The course Canvas site is an online resource supplement for this course. Use of this site and the information provided is **not** a substitute for attending lectures. The site will be updated regularly throughout the semester. This site contains:

- Discussion Board (Course Announcements, student questions)
- Links to web pages that will be of use to you throughout the course
- Handouts and articles
- Lecture slides (generally posted after lecture is presented)
- Assignment submission
- Rubrics and feedback for major assignments

My intention is that the site will become an additional forum, outside of class, in which we can debate, discuss, and raise questions about the course material. **Check this site regularly for course announcements, articles, assignments, and other course materials.**

Course Requirements and Assignments

The assignments in Psychology 100W are designed to **gradually build the writing and research skills necessary to write scholarly papers** appropriate for the discipline of psychology.

Please review the Assignment Summary sheet that appears at the end of this syllabus. Details for each assignment are provided in lectures and in assignment information sheets. Assignment information sheets (as well as other useful resources) can be found on the course Canvas site. You are expected to bring copies of each handout (paper or electronic) to the appropriate class.

The written assignments in Psychology 100W are designed to **gradually build the writing and research skills necessary to write scholarly papers** appropriate for the discipline of psychology. The major skills and associated assignments include (but are not limited to):

- **Basic skills review** (e.g., plagiarism tutorial, research skills tutorial, formatting tips in Microsoft Word)
- **APA style** (e.g., APA style Mastery test)
- **Writing assignments** (including, but not limited to)
 - Dissecting a Literature Review
 - Article Summaries and Evaluations*
 - Literature Review* (*see description below*)
 - Literature Review development (*see description below*)
 - Peer Reviews
 - Brief Research Report* (*see description below*)

* Students will be given the opportunity to revise in response to instructor feedback and resubmit

Mini-Literature Review

The major paper for this course is a literature review (see description below). To prepare you for this assignment you will write a “mini-literature review” (800 – 1000 words) that will help you to learn how to read, understand, and accurately report psychological research reports, develop synthesis skills by describing how studies build upon one another, and apply APA style.

Literature Review

The major paper you will be writing for this course is an ***APA style literature review*** (approximately 2000 - 2500 words including references; 10 or more scholarly references). The goal of a literature review is to answer a research question by describing and synthesizing relevant theory and research findings relevant to the question. You will be developing your final literature review in several assignments, including (but not limited to):

- **Research Question Assignment** in which you develop, with help from the instructor, a research question appropriate to the discipline of psychology and to the requirements of the course.
- **Annotated References Assignment** in which you identify at least 10 – 15 sources relevant to your literature review topic using databases and other resources appropriate to psychological research.
- **Outline Assignment** in which you organize the main points of your literature review and indicate which sources will be used to support the main point, and how it will do so (e.g., full summary of the article vs. “microsummary” of the article)
- **Literature Review Conferences and Drafts** in which you receive feedback from a variety of sources and revise your paper as needed.

Research Report

A second major paper you will be writing for this course is an ***APA style research report*** (approximately 1000 - 1500 words including references). The goal of a report is to describe the results of an empirical study. We will be conducting a simple study in class, and you will write the research report as if you were the experimenter.

Final Examination or Evaluation

The final evaluation for this course is the oral presentation of students' literature review. Due to time constraints, these presentations are scheduled over several class periods at the end of the semester – including during the time of the final exam.
