

I am seeking to be re-elected Chair of the Curriculum and Research (C&R) Policy Committee for Academic Year 2022/23. I have served as chair the last for academic years and I would like to complete our work that is relevant to AB928 that could restructure our GE Program. It is anticipated that we will begin working in the Fall semester to gather feedback to this regard. I have a tremendous amount of knowledge on our GE program having led the committee the last several years as we undertook updating the GE Guidelines. The committee also has a few referrals remaining from last year that I would like to finish on noting that we will most likely take up the first-year experience policy with the feedback we gathered from the senate retreat this year. I firmly believe in the shared governance process. I also strongly believe that transparency and open communication are imperative in the shared governance process. I would continue to ensure that all voices are being heard as the committee works on various policies and GE next year. Thank you for taking your time to consider my application.

Respectfully,

Brandon White

Professor

Department of Biological Sciences
