

***AY 2012-13 Meetings Held:***

**September 21, October 19, November 16**

**December 21 (meeting canceled)**

**February 1, March 1, April 5, and May 3**

***Overall AY Action Items Voted by PPC:***

As per PP policy, non-accredited programs are reviewed every 5 years.

Accredited programs are due for program planning review one semester after their accreditation visit; a program review cycle can vary depending on the accreditation cycle.

Accredited programs cannot submit the accreditation report as their required program plan; the program must prepare a 25 page report based on the Program Planning Guidelines and similar to reporting non-accredited programs.

Departments/programs may request an extension, however their program planning cycle will not change; program planning cycles will remain the same, unless changed by UGS/Dean and approved by vote (PPC).

Departments/programs are required to send their extension requests to their Dean's office for approval. Dean approved extension letters will need to be sent to Undergraduate Studies by the Dean's office and approved; PPC will no longer vote regarding acceptance/non-acceptance of an extension. Accredited programs will need to request an extension if the accrediting agency requires additional information at the time of the site visit that will cause a delay in their program plan submission.

The College Committee review portion of the Program Plan is now optional, not required.

WASC Rubrics for Program Planning are part of new guidelines and relate to a program's funding feasibility; programs need to address funding issues within the program plan. A new WASC handbook will be released soon, however date currently unknown.
