- Describe and reflect upon departmental scholarship/creative activities. Evaluate your performance in this area in regard to your own expectations and challenges with meeting those expectations.. The nature of this report will vary depending on discipline, but might include items such as: publications, books, conference presentations, grants, compositions, etc. If applicable, include how students are involved in departmental scholarship/creative activities as part of high impact practices.
 - Discuss Departmental goals for RSCA in next five years and strategies to achieve them.
 - Report infrastructure needed to support RSCA activities that is not currently available or functional.
- i. It may cause tension to have it listed by individual instead of department
 - ii. Maybe make it anonymous, no faculty names associated with it.
 - iii. Department could make decision as to how it is reported. Either as department whole or by individual faculty.
 - iv. Provide an reflection on their expectations of activities/scholarship
 - v. It aligns with the movement the university is moving. This would be a campus desire in PP, as it is not something that WASC/CO requests as part of the process.

 - e. Recommendation is that College needs to consider giving priority to CHAD for faculty hires due to concern around sustaining quality of curriculum/program due to the imbalance between adjuncts and full-time faculty.

****Action-** Approve ChAD Letter to the Provost: **17-Yes**, 0-No, 0-Abstain

- The questions will be on the google drive for us to review and edit before they are due to Cami Johnson at end of february. This will be part of the package given to WASC.
- Does the template and data gathered help a program build an argument for their resource needs.
- Action Plans are very new to our process. We do not have enough data to know how effective they are. We are in process of assessing how our new process works.
- There is an issue regarding who reviews the annual assessments that have to address how the Action Plan is playing out.
 - i. we're still so new on this process we will need to look at the process when all committees (PPC, BOGS and ASMT) are up to speed with new procedures.

4. Discussion of Changes to Policy of PPC

- The issue of how we evaluate minors within a requirement, C&R is taking this issue up as there is no policy around this.
 - i. They are going to look into who should be reviewing the minor the program who houses it, or the program that includes it as part of their degree requirements.
- Certificates are going to become a similar issue, how are they incorporated into the review process.
- PE waivers will become part of our process in the next year, those programs are going to start coming in this Spring.

- Credit hour review is a new policy and is now part of our review process.
 - i. It's a 1 to 1 (1 unit= 1 hour in class, 1 hour outside)

3. Upcoming Programs
 - a. AFAM, Computer Science, MUDA, LLD
4. Welcome Scott Heil, new IEA Director now representing that area on PPC.
5. Review of SISS
 - a. The merger occurred due to resources, the overlap created the idea that it would work as a merged department. Coherency is still an issue as they figure out how best to support each other.
 - b. If program conceptually relate, then we should be able to ask departments to write the plan as one while still discussing how the fusion works within the department.
 - c. Reviewer was critical of Masters program, it was not as rigorous as undergraduate program. They were concerned with the culminating experience and how students were choosing projects instead of thesis.
 - d. Requesting department to be more clear on how courses are being assessed, what rubrics, assignments, etc that need more detail in the report. This request is being made of all programs not just SISS.
 - e. They reviewed their Teacher Prep programs as one and not two which is how they offer. They should have been evaluated/assessed separately as they address different areas of Teaching. (Teacher Prep programs as a whole are being researched as they historically started to appear as concentrations, we are looking for clarification on how those programs are actually supposed to function (i.e. as Concentrations or Advising Emphases) from the Chancellor's Office).

- f. They have quite a few minors, yet we [University] do not track graduation rates for minors, so we can not discuss or address any issues around minors when programs aren't able to assess them properly.

****Action-** Approve Letter to the Provost for SISS: 0-Yes, 0-No, 0-Abstain

****Action-** Approve April 3rd Meeting Minutes: 11-Yes, 0-No, 2-Abstain

****Action-** Approve March 6 Meeting Minutes: Unanimous 13-Yes, 0-No, 0-Abstain

****Action-** Approve February 6th Meeting Minutes: Unanimous 13-Yes, 0-No, 0-Abstain

2. SISS Letters

- a. Our recommendations regarding faculty would merely support the departments claims/requests to College.
- b. Some programs do have Action Plans from previous Program Review cycle and we must address whether they have fixed/adjusted issues that were addressed in that plan.
- c. We will address all the concerns around the merger at the Action Plan meeting.
- d. Leaving in discussion about BA Social Sciences and its future in regards to how it would affect the Teacher Preparation programs.

****Action-** Approve SISS Letter to the Provost: Unanimous 13-Yes, 1-No, 0-Abstain

3. Issues with Recommendations about discontinuing programs

- a. Why are we telling programs to shut down
- b. We merely ask them to consider, if we really want to have a program close it has to go to C&R before even getting to an Action Plan Meeting
- c. This can always be discussed and taken out of the Final Action Plan at the Action Plan Meeting with the Provost
- d. This gives them a way to justify the reasons for keeping their program small, as long as they have supportive data (good grad and retention rates).
- e. We have a lot of small programs, maybe we should develop a different template for these programs for them to justify their data as a means for why our resources should be continued to be spent on them. Get them to think critically about their fit in the University offerings.

4. Minors

- a. We have asked C&R to evaluate the Minor policy, but they are not sure how to address the policy.
- b. Students should be declaring minors at Junior status (90 units).

- c. If a minor is thriving why isn't it a major.
 - d. If a program includes a minor then obviously the department feels the student is gaining something from taking this minor.
 - e. We do know how many students are graduating in minors.
 - f. We can talk about how many students are in the minor at one time, although they do get counted retroactively
 - g. A minor has outcomes so they technically should be assessed, could we possibly develop an exit survey for students who have to complete this.
5. World Languages and Literatures (WLL)
- a. They prepared their document as if they were all separate degree programs, so seven individual like documents were submitted.
 - b. BOGS does have the GE review completed for this program.
 - c. They seem to function as silos, does not seem to have a "gathering of the minds" sort of collaboration about their department. This was noted in recommendations from the reviewer.
 - d. Should we be giving more support to departments to help them get their documents with the elements we need and want from them.
 - i. Maybe we should invite them to sit in the room during the meeting

****Table to finish at next meeting**
