

## Arthropods Reflection Sheet

1. Based on your observations today, what are 5 traits that you believe all arthropods share? How might these traits separate them from other animals?
2. What was challenging about figuring out arthropod traits based on the given images? Why are these challenges an important part of scientific inquiry?
3. How is today's activity similar to investigations scientists make on a regular basis?
4. Based on your observations today, draw a picture of an arthropod below and label one aspect of it that you believe makes it an arthropod.
