Hypothesize the Effects of Darkness on MHC

(Each Hypothesis Must Consist of One Complete Sentence)

Nocturnal	Locomotive

Madagascar Hissing Cockroach (MHC) Log Key

Document the Effects of Light on MHC

(Each Documentation Must Consist of One Complete Sentence)

(Answers Will Vary)

Nocturnal	Locomotive
I observed many MHC trying to sleep inside of their well-lit classroom habitat, perhaps to hide from the light.	I observed many MHC walking toward and hiding in shady areas inside of their well-lit classroom habitat.

Hypothesize the Effects of Darkness on MHC

(Each Hypothesis Must Consist of One Complete Sentence)

(Answers Will Vary)

Nocturnal	Locomotive
Based on the effects of light on MHC's nocturnal behavior, I hypothesize that MHC will not be sleeping in dark environmental conditions.	Based on the effects of light on MHC's locomotive behavior, I hypothesize that MHC will be very energetic in dark environmental conditions.
