

Team Members: _____

Observation Worksheet

1. Twist the paper towel until it is a tight long rope.
2. Place one end of the paper towel in the water and the other end in the empty glass.
3. Observe what happens.
4. Write or draw your observations and answer the questions below.
5. Be prepared to share your observations in class.

Describe or draw your observations:

What questions do you have about these observations?

What can you conclude from these observations?
