

The Food Web

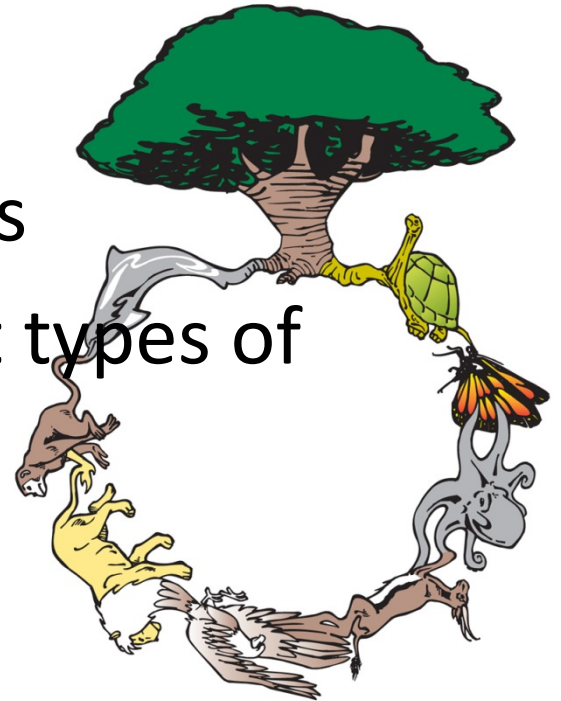

Plants

- Everything in the food web starts with plants. They absorb energy from the sun, water and nutrients in the Earth.

Animals

- Animals need water and nutrients too but they get it through eating other things.
- Some animals eat plants
- Some animals eat dirt
- Some animals eat other animals
- What do we call these different types of animals?

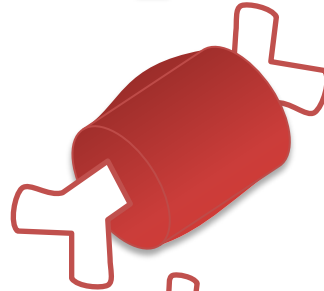

The different type of animals

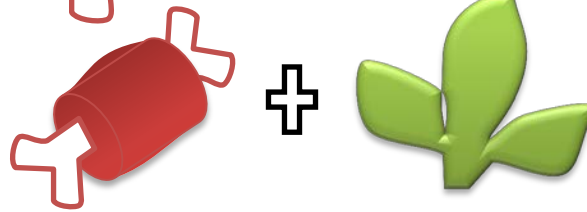

- Herbivore - they eat

- Carnivore – they eat

- Omnivore – they eat

- Decomposer – They are
dead things.

and eat

The Food Chain
