

# Business Students Writing on the Job

---

DO 100WB GRADUATES HAVE THE NECESSARY WRITING  
SKILLS FOR TODAY'S WORKPLACE?

# Research Methodology

---

## **On-line Survey**

- SJSU College of Business (CoB) graduates (CY 2013-2015)
- Quantitative
- Total Responses = 108

## **In-person Interviews**

- CoB faculty recommended by Dean
- Qualitative
- Total = 4

Conducted in March-May, 2017

# Survey Purpose

---

To assess whether CoB graduates felt they had the necessary writing skills to fulfill their current job requirements and to provide direction on how 100WB curriculum could be improved.

# Faculty Interview Purpose

---

To gather anecdotal evaluations on the writing preparedness of CoB students for upper division business courses.

# Survey Result Confidence

---

**We can be 95% confident (level of certainty) that the whole population's response is between +/- 10 pts (margin of error) of the survey result.**

E.g. If we surveyed 100% of the 3,627 CoB graduates who received this survey, their actual answer would be within a +/- 10 pt. range of the survey result.

# Findings

Results of Survey

# The Good News

**Evaluation of How Well Personal Writing Skills  
Meet Current Job Requirements  
(108 Responses)**

# Email: Most Frequently Used Medium

**Frequency of Business Communication, By Type  
(108 Responses)**

More Than Once/Month   Several Times/Year   Less Than Once/Year   Never

# Top Purpose for Writing: Routine Requests

**Frequency of Business Communication, By Purpose**  
(107 Responses)

More Than Once/Month   Several Times/Year   Less Than Once/Year   Never

# Most Frequent Type: Short, Informal Reports

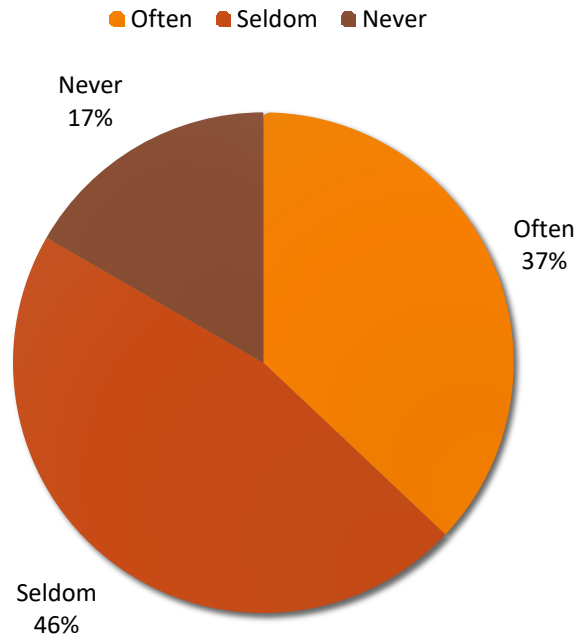

**Frequency of Business Communication, By Type of Document  
(107 Responses)**

# Frequency of Collaborative Writing: Low

---

**Frequency of Collaborative Writing**  
**(108 Responses)**

# Keys to Success: The Big 5

## Importance of Writing Skills to Work Success (108 responses)

# Writing Skills: Feel Confident Using

---

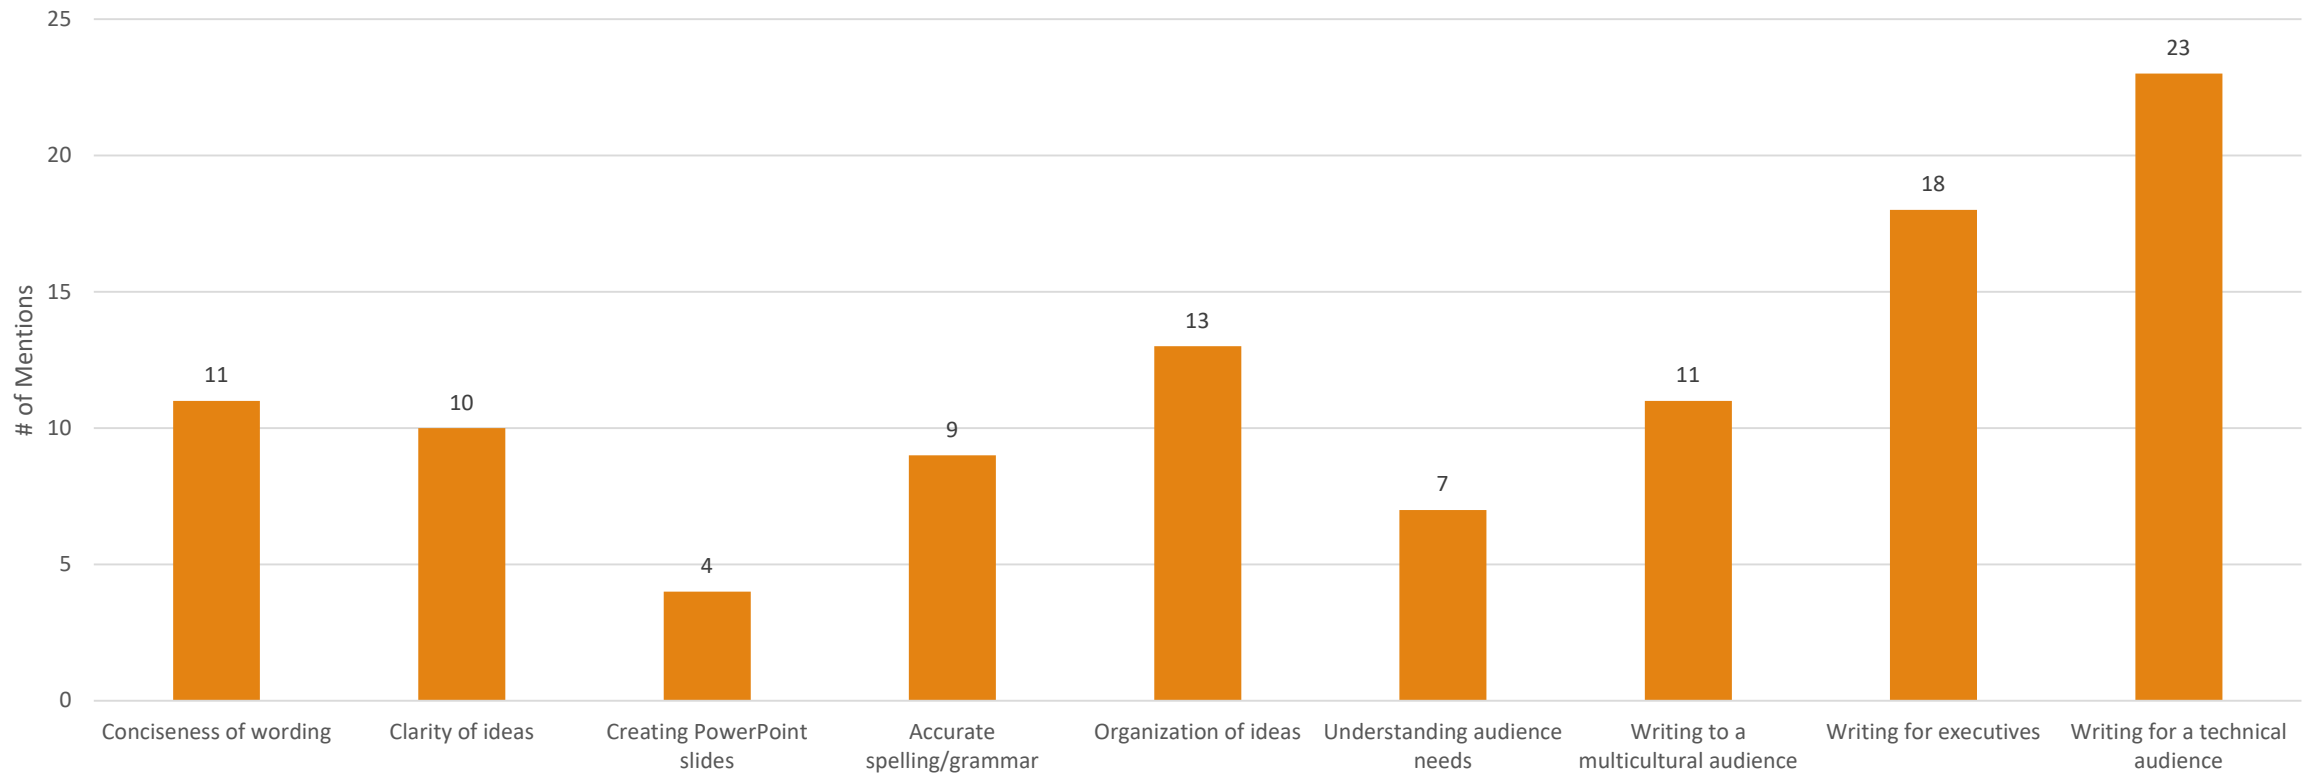

Student Is Confident Using These Skills  
(102 responses)

# Writing Skills: Improvement Desired

---

Skills Student Would Like To Acquire  
or Become More Comfortable Using

## Student Suggestions to Improve 100WB

Based on your experience,  
what suggestions do you have  
to help us improve writing  
instruction for undergraduate  
business majors?

(86 responses)

# More Emphasis on These Skills

1-2 mentions: Writing for Execs, Tech/Product related, Persuasion, PowerPoint

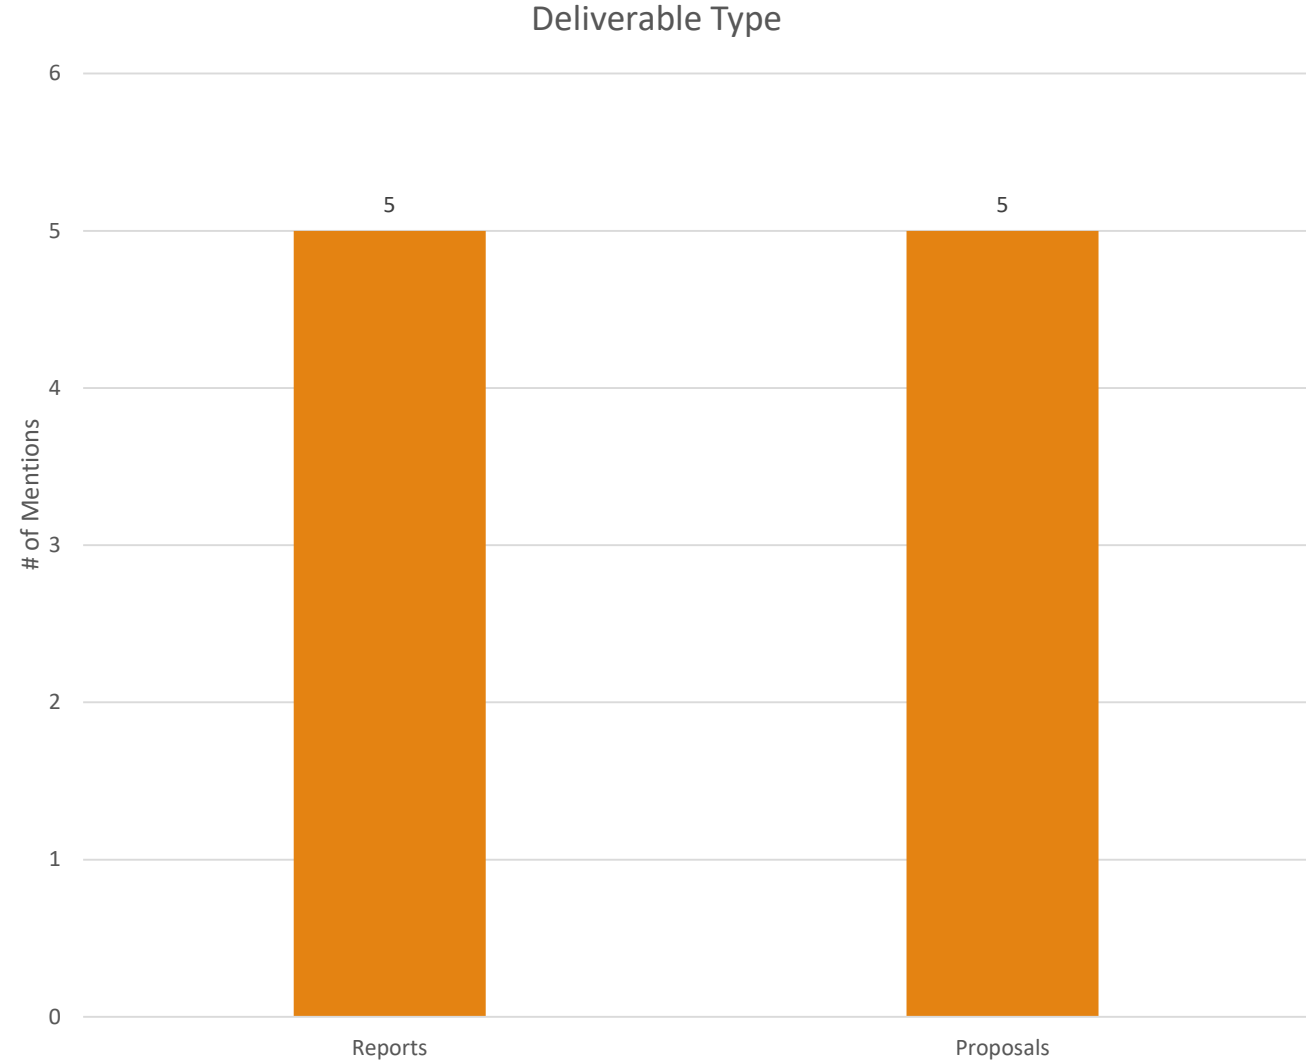

# Medium to emphasize: Email

---

# Most Mentioned Types: Reports and Proposals

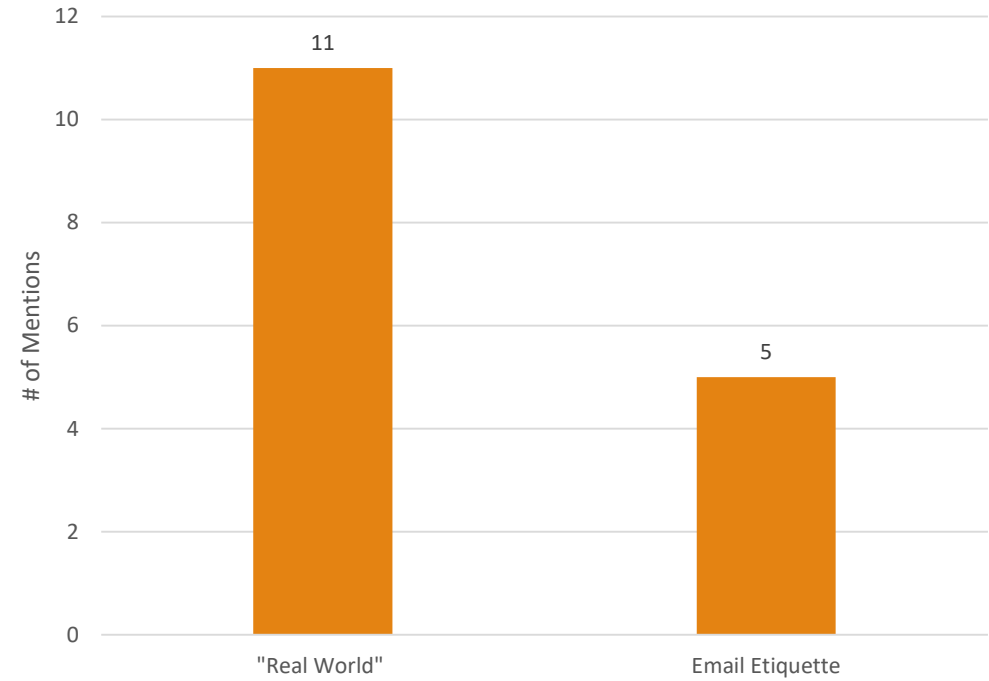

# More Real World Scenarios

---

## PROCESS

## CONTENT

# Faculty Selection and Participation

---

## **Selection:**

- Recommended by Acting Dean Malu Roldan (4 CoB faculty)
- Valued good writing

## **Participation:**

- Input on student survey questions
- 45 minute interviews

# Faculty Interview: Summary

---

Faculty mentioned “The Big 5”, but with different emphasis.

- Organization

- Audience

- Grammar

*More Often Mentioned*

- Clarity

- Conciseness

*Less Often Mentioned*

# Faculty Comments: Organization

---

- No organization of ideas---need outlining skills.
- “Too stream of consciousness.” Need to practice outlines.
- Claims need substantiation with details. “Every sentence or next one should have data”.
- Stronger support of arguments.

# Faculty Comments: Audience

---

- Lack of knowledge of expected formality: \$5,000 scholarship nomination mistake.
- Learn to say “no” to your boss.
- Lack ability to think about audience well. “Think of someone reading this that isn’t in the class”.
- Practice the same message with inward and outward-facing audiences.

# Faculty Comments: Grammar

---

- Spell checker not used---fragments.
- One ex-CEO rejected reports that had a lot of grammar mistakes.
- Need to avoid hyperbole (e.g. “astonishing results”)
- Overuse of commas
- Proofreading/editing skills are badly needed
- Errors seen: Commonly confused words; subj-verb agreement; jargon; using wrong pronoun, esp. not knowing that “company” is “it”.
- Grammar is an issue for the minority (10%).

# Faculty Comments: Clarity

---

Clarity of purpose of writing is very important.

Explaining complex ideas clearly is needed.

# Faculty Comment: Conciseness

---

“Stressing word count can be a negative. Stress covering the subject instead.”

Conclusions

# Conclusions

1.) Room for improvement to have skills to meet job requirements.

- 44% “most of the time”
- 9% “half the time or less”

2.) Important skills for success: Conciseness, Clarity, Organization, Audience, Grammar.

3.) Most common purpose = Routine Tasks (e.g. requesting, coordinating, delegating, informing)

4.) Email, texting, IMs---most frequently used.

## Conclusions (con't)

- 5.) Want “real world” business scenarios.
- 6.) Short more common than long.
- 7.) Semi-formal more common than formal.
- 8.) PowerPoint used frequently & competently.
- 9.) New skills desired: writing for execs and technical audiences

# Implications

Ideas to Consider for 100WB Curriculum

# Implications

- 1.) Integration of “Top 5” into all assignments (Organization, Audience, Clarity, Conciseness, and Grammar).
  - Impact on lesson plan sequence, assignments, evaluation?
- 2.) Fewer long reports, more shorter assignments.
  - How to achieve 8,000 goal?
  - Impact on workload (students and instructor)?
- 3.) Need to develop a resource of “real world” scenarios as assignment prompts (e.g. case studies, current news, textbook examples)
  - Collaborative effort?
- 4.) Re-evaluation of purposes of assignments
  - E.g. Are “giving negative news” and oral presentations needed?

*Discussion?*
